## STATISTICS OF INCOME FOR 1935

#### PART 1

# INDIVIDUAL INCOME TAX RETURNS, ESTATE TAX RETURNS, AND GIFT TAX RETURNS

Treasury Department,
Office of Commissioner of Internal Revenue,
Washington, D. C., September 28, 1938.

Sir: In accordance with the provision in the Revenue Act of 1916 and subsequent acts requiring the publication annually of statistics with respect to the operation of the income, war-profits, and excess-profits tax laws, I have the honor to transmit herewith a report entitled "Statistics of Income for 1935, Part 1," prepared from individual income tax returns for 1935 filed during 1936, with a historical presentation of the income and of the tax liability reported by individuals since the inception of the present period of income taxation under the sixteenth amendment to the Constitution. The report also contains tabulations of data from estate tax returns filed during 1936, irrespective of the date of death of the decedent, as well as tabulations of data from gift tax returns filed during 1936, with brief historical summaries.

#### INDIVIDUAL INCOME TAX RETURNS

RETURNS TABULATED

Individual income tax returns for 1935 were filed under the provisions of the Revenue Act of 1934. The major changes made by this act affecting individual income taxes are set forth in the synopsis of individual income tax rates, credits, and exemptions on pages 132–139.

The year for which the income is reported is, in general, the calendar year ended December 31, 1935. However, a negligible number of individual returns is filed for a fiscal year other than the calendar year. The returns for a fiscal year ended in the period July, 1935, through June, 1936, are tabulated with the calendar year returns. There are also included part-year returns for which the greater part

of the accounting period falls in 1935.

The general tables for individuals include only returns with net income. The data tabulated from individual returns with no net income are shown on pages 29–30 and 127–128. Prior to 1928 no tabulations were made from individual returns with no net income. The filing of returns with no net income or with a net income of less than \$1,000 is due to (1) the provisions of the Revenue Act of 1921 and subsequent acts requiring that a return be filed by every individual with gross income of \$5,000 and over, irrespective of the amount of net income or deficit, and by every married couple living together and having an aggregate gross income of \$5,000 and over; (2) married couples electing to file separate returns, as provided by law; (3)

returns filed in the case of the death of the taxpayer covering the income period to date of death; and (4) part-year returns filed by

taxpayers electing to change the accounting period.

The statistics are taken from returns as filed and prior to any revision or adjustment that may subsequently be made as a result of audit by the Bureau of Internal Revenue, and include data from amended returns showing net income of \$100,000 and over, but not from tentative returns, or amended returns with net income under \$100,000. The data from income tax returns filed by individuals reporting net income of \$5,000 and over are tabulated from each such return. Individual returns of net income under \$5,000 filed on Form 1040, which display income characteristics similar to those usually found in returns of net income of \$5,000 and over, such as varied or unusual sources of income or large total income, pass through the Statistical Section, and the data are tabulated from each of these returns

The statistics pertaining to individual returns with net income under \$5,000, excepting those on Form 1040 specified above (which numbered approximately 285,000), represent estimates based on samples of such returns. Averages for the various items from a sample for each State are applied to the total number of returns of the class which they represent to secure estimates for the particular State. The samples are selected from both forms on which individual incomes are reported—Form 1040 for net income from salaries or wages of more than \$5,000, or income regardless of amount from business, profession, rents, or sale of property; and Form 1040A for net income of not more than \$5,000, derived chiefly from salaries and wages. All returns, Form 1040, are sent to Washington for administrative action and those with net income under \$5,000, excepting those referred to above, are sampled by the Statistical Section. The returns, Form 1040A, are retained in the collection districts and samples only are sent to Washington.

The sample for 1935 included approximately 252,000 returns on Form 1040 and 299,000 on Form 1040A, representing for each collection district not less than 10 percent of the number of taxable and nontaxable returns, Form 1040 and 1040A, with net income under \$5,000. The minimum for Form 1040 was 4,000, or 10 percent of the number filed, whichever was larger, and for Form 1040A the minimum was 2,000, or 10 percent of the number filed, whichever was larger. When the number of returns filed in a collection district in this class was less than 4,000 in the case of Form 1040 or 2,000 in the

case of Form 1040A, the entire number filed was tabulated.

For 1929 and subsequent years the number of returns with net income under \$5,000 is based in part on Income Tax Unit reports and in part on reports of collectors; for years prior to 1929, it is based on collectors' reports. (See 1929 Statistics of Income, p. 2.)

## DEFINITION OF NET INCOME

Throughout this report "net income" represents the amount of gross income, as defined in the revenue acts effective for the year for which the returns are filed, in excess of the deductions claimed by the taxpayer under the provisions of the respective acts, and "deficit" means excess of deductions over gross income. Credits allowed

individuals, such as personal exemption, credit for dependents, and

credit for earned income, are not included in deductions.

Net income includes gains and losses from the sales of capital assets to the extent required or allowed under the Revenue Act of 1934. (See pp. 7-8 for a statement concerning treatment of net capital gains and losses.) Surtax net income represents the amount of net income less personal exemption and credit for dependents. The amount of net income subject to normal tax is determined by subtracting from the surtax net income the amounts of interest received on Government obligations not wholly exempt from tax, dividends received, and earned income credit.

#### TAX LIABILITY AND COLLECTIONS

The amount of tax liability as reported on the returns is not precisely comparable with the amount of individual income tax collections during the calendar year in which the returns are filed. Several factors are responsible for the difference in the taxes collected and the tax liability reported on the returns, among which are the following:

1. The amount of tax originally reported may have been subsequently revised as the result of audit of returns. The revisions may result in additional assessments, thereby increasing the tax liability, or in certificates of overassessment, representing abatements and credits, which reduce the tax liability originally reported. An

amended return has the same effect as an audit revision.

2. Income and profits taxes paid to foreign countries or possessions of the United States may be taken as a deduction from gross income or applied with certain limitations as a credit against the income tax payable to the United States. The amount of such taxes taken as a credit by individuals against the income tax liability to the United States has not been deducted from the amount of income tax liability shown in the tabulations in this report. The aggregate amounts of this credit, which are available only for the years 1925 to 1930, inclusive, appear on page 9 of the Statistics of Income for 1930.

3. Individual income taxes paid at the source on tax-free covenant bonds are deductible from income taxes payable by individuals but are not deducted in arriving at the income tax liability of individual returns

shown herein

4. The amount of tax liability on fiscal year returns may not represent taxes collected during the calendar year in which the returns are filed.

5. Tabulations in this report exclude data reported on the individual income tax returns, Form 1040C, used by departing aliens, whereas collections in the current year include taxes paid by these individuals.

6. Delays in payment due to financial embarrassment, death, liquidation of business, or any other cause result in collections of taxes after the close of the year in which such taxes are due, and the classification of such collections as "back taxes" because made in a subsequent year. For similar reasons, certain amounts are uncollectible.

7. Collections in the current year include such interest and penalty items as are received in connection with delinquent payments on

returns.

#### GEOGRAPHIC DISTRIBUTION

Individual income tax returns may be filed in the collection district in which the taxpayer resides or in which his principal place of business is located. Although the returns are tabulated by the States in which they are filed, the data do not represent the geographic distribution of the sources of income, as income reported by an individual in one State may have been derived from sources in other States.

#### COMPARABILITY WITH PREVIOUS REPORTS

In various sections of this report, attention is directed to changes in the provisions of the revenue acts under which the returns for given years are filed which interfere with a precise comparability of the data over a period of years. The major provisions of the revenue acts from 1913 to date are shown on pages 129–142.

#### NUMBER OF RETURNS, NET INCOME AND TAX

The returns of individuals reporting net income for 1935 numbered 4,575,012, of which 2,110,890 were taxable and 2,464,122 nontaxable. Aggregate net income was \$14,909,812,025, of which \$10,034,105,975 was reported on taxable returns and \$4,875,706,050 on nontaxable returns. The total tax liability reported on taxable returns was \$657,439,343. Tax liability averaged \$144 for all returns and \$311 for taxable returns. The effective tax rates were 4.4 percent for all returns and 6.6 percent for taxable returns. The number of returns reporting a net income was 3.6 percent of the total population (Census

Bureau estimate of population as of July 1, 1935).

As compared with returns for 1934, the total number of returns increased by 480,592, or 11.7 percent, the number of taxable returns increased by 314,970, or 17.5 percent, and the number of nontaxable returns increased by 165,622, or 7.2 percent. The total net income increased \$2,113,009,943, or 16.5 percent, the net income on taxable returns increased \$1,690,547,684, or 20.3 percent, and the net income on nontaxable returns increased \$422,462,259, or 9.5 percent. The tax liability increased \$146,039,565, or 28.6 percent. The effective rates of tax for 1934, which were slightly lower than those for returns for 1935, were 4.0 percent for all returns and 6.1 percent for taxable returns

The distribution of returns of individuals by States and Territories is given in the basic table 1, page 73, and by net income classes in basic table 2, pages 74–75. Each of these tables shows number of returns,

net income, tax, personal exemption and credit for dependents.

SIMPLE AND CUMULATIVE DISTRIBUTION BY NET INCOME CLASSES OF NUMBER OF RETURNS, NET INCOME, AND TAX

The distribution of returns by a limited number of net income classes is exhibited in the following table, which includes the number of returns, net income, and tax; also cumulative totals and percentages. In basic table 3, pages 76–78, a similar distribution of the number of returns, net income, and tax, is shown by a more detailed net income classification.

#### CLASSIFICATION BY SEX AND FAMILY RELATIONSHIP

The table presented herewith shows the number of individual returns and the net income distributed according to sex and family relationship of the taxpayer. In basic tables 4 and 5, pages 79-84, similar data are shown by States and Territories and by net income classes, respectively.

This year, the separate returns of husbands and the returns of estates and trusts are shown for the first time. In prior years, the separate returns of husbands were tabulated with the joint returns of husbands and wives, the returns of estates were distributed among the various groups of returns according to the sex and family relationship of the testator or grantor, and the returns for property held in trust were distributed according to the sex and family relationship of the beneficiary, if the status of the beneficiary could be determined, or according to the sex and family relationship of the testator or grantor, if

the status of the beneficiary could not be determined.

The tabulation of the returns showing community property income excludes returns with net income under \$5,000 and joint returns of husband and wife with net income under \$10,000. married persons not showing community property income filed in the eight community property States are classified according to the status reported, as joint returns of husbands and wives or separate returns of husbands and wives. In tabulating joint returns showing community property net income of \$10,000 and over, with tax liability apportioned between husband and wife, the items of income and deductions are divided to represent two community property returns, the net income class for each of the separate returns being one-half of the combined community income. Separate returns of husbands and wives showing community property income of \$5,000 and over are classified as community property returns by net income classes according to the net income on each return.

<sup>&</sup>lt;sup>1</sup> For general explanations, see pp. 1-4.
<sup>2</sup> An unequal number of separate returns of husbands and wives results from the use of the sample method for returns with net income of under \$5,000, as the net income of one spouse maybe \$5,000 or over and that of the other spouse under \$5,000 (see discussion of sample, p. 2).

#### PERSONAL EXEMPTION AND CREDITS AGAINST NET INCOME

The net income specifically exempt from normal tax through personal exemption, credit for dependents, earned income credit, dividends on stock of domestic corporations, and interest on Government obligations not wholly exempt from tax, together with net income subject to normal tax is shown in the following table:

#### CAPITAL GAINS AND LOSSES

The special provisions in the revenue acts for capital gains and losses from the sale of assets held more than two years apply, for capital gains, to sales after December 31, 1921, and prior to January 1, 1934, and for capital losses, to sales after December 31, 1923, and prior to January 1, 1934. A summary of the provisions of the Revenue Act of 1921 and subsequent acts, affecting the tax on capital gains, and of the provisions of the Revenue Act of 1924 and subsequent acts, affecting the tax credit on capital losses, is found on pages 8 and 9 of the Statistics of Income for 1933 and in the synopsis of laws in this report, pages 138-139. The "total income" and "net income" for individual returns for 1922 through 1933, as presented in the historical tables in this report, pages 37-42, include "capital net gains," whereas for the years 1924 through 1933 the "net income" has not been reduced by and "deductions" have not been increased by the amount of "capital net losses" reported for tax credit.

Under the Revenue Act of 1934 the definition of capital assets is extended to include assets held by the taxpayer, regardless of time held, instead of only assets held over two years. Also, certain percentages of the gain or loss recognized upon such sales or exchanges are taken into account in computing net income. These percentages vary according to the period for which the assets have been held. The deduction for net capital losses is limited to an amount not in excess of \$2,000, after subtracting the prorated gains from the sales or

exchanges of capital assets.

<sup>&</sup>lt;sup>1</sup> For general explanations, see pp. 1-4.
<sup>2</sup> Interest received on Liberty 4 and 4½ percent bonds, United States savings bonds, and Treasury bonds, owned in excess of \$5,000, and on obligations of certain instrumentalities of the United States (see items 9 and 25, Form 1040, p. 146) reported on returns with net income of \$5,000 and over.

<sup>3</sup> Includes taxable interest received on partially tax-exempt Government obligations reported on returns

The net income reported on the individual income tax returns for 1934 and 1935 includes net capital gains and net capital losses computed in accordance with the above limitations. It is not possible, by using the net capital gain and net capital loss on the returns for 1934 and 1935, to adjust the "total income," "net income," and "deductions" so that they will be comparable with these items tabulated for prior years. Moreover, net capital gains and losses reported on individual income tax returns for 1934 and 1935 are not comparable with "profit and loss from sale of real estate, stocks, and bonds, etc.," "capital net gain," or "capital net loss" which were reported on returns in prior years.

#### SOURCES OF INCOME AND DEDUCTIONS

In the table on page 9 there appears a distribution, by sources, of the income and deductions reported by individuals. Income from the various sources represents the net amount by which the gross receipts exceed the deductions allowed, as reported in the schedules of the return (see Form 1040, p. 146), and in aggregate represents the sum of the net amounts of income from each source. Net losses reported under "income" items on the face of the returns are transferred in tabulation to deductions, which also include amounts reported on the return under "deductions."

Income from partnerships and fiduciaries does not include amounts received through these entities from dividends on stock of domestic corporations or from taxable interest on obligations of the United States, since these items are reported under their respective classifications. In returns for 1934 and 1935, the income from partnerships and fiduciaries includes the net capital gain and loss resulting from

their sales of capital assets.

With reference to the amount of net capital gains and net capital losses, attention is directed to the provisions of the Revenue Act of 1934, as described in the section of the text entitled "Capital gains and losses."

The items of "interest paid" and "taxes paid" which are reported under "deductions" on the individual income tax returns do not include amounts reported as business deductions in schedules A and B.

Interest paid is reported as item 13, on the face of the return, Form 1040, in accordance with the following instructions:

Enter as item 13 interest paid on personal indebtedness as distinguished from business indebtedness (which should be deducted under schedule A or B). Do not include interest on indebtedness incurred or continued to purchase or carry obligations (other than obligations of the United States issued after September 24, 1917, and originally subscribed for by the taxpayer) the interest upon which is wholly exempt from taxation.

Taxes paid exclude (1) the Federal income tax, (2) estate, inheritance, legacy, succession, and gift taxes, (3) income and profits taxes paid to foreign countries or possessions of the United States, which are allowed as a credit against the tax, and (4) taxes reported on Form 1040F, schedule of farm income and expenses. Taxes paid are reported as item 14 on the face of the return, Form 1040, in accordance with the following instructions:

Enter as item 14 personal taxes and taxes paid on property not used in your business or profession, not including those assessed against local benefits of a kind tending to increase the value of the property assessed. Do not include Federal income taxes, nor estate, inheritance, legacy, succession, and gift taxes, nor taxes imposed upon your interest as shareholder of a corporation which are paid by the corporation without reimbursement from you, nor income taxes claimed as a credit in item 33. No deduction is allowable for any portion of foreign income and profits taxes if a credit is claimed in item 33.

A historical summary of taxes paid for the years 1927 through 1932 and of interest paid for the years 1928 through 1932 is found in the 1932 Statistics of Income, table 8A, page 80.

The following table shows, for a limited number of net income classes, the distribution of total income by sources, specific items of deductions, and net income. The distribution by States and Territories and by more detailed net income classes is shown in basic tables 6 and 7, respectively (pp. 85-92). The following text table and basic table 7 also show the total number of returns in each net income class and, for returns with net income of \$5,000 and over, the number of returns on which were reported specific sources of income and deductions. The table on page 12 shows for a limited number of net income classes the percentage distribution of sources of income, deductions, and net income.

FREQUENCY DISTRIBUTION OF SELECTED SOURCES OF INCOME AND LOSS BY NET INCOME CLASSES AND BY SIZE OF EACH SOURCE OF INCOME AND LOSS

For returns with net income of \$5,000 and over, there is shown in the following table the frequency distribution of selected sources of income and loss by net income classes and by size of each source of income and loss.

Sources of income not included in this tabulation are partnership, fiduciary, interest, and other income. The total income received through partnerships and fiduciaries cannot be shown in this table as such income may not be fully included under these items in the individual income tax returns. The instructions on the return Form 1040 provide as follows:

Enter as item 5 your share of the profits (whether received or not) (or of the losses) of a partnership, syndicate, pool, etc.. and as item 6 income from an estate or trust, except that the share of (a) taxable interest on obligations of the United States, etc., shall be included in schedule D, and (b) profits which consisted of divdends on stock of domestic corporations which are subject to income tax shall be included in item 10 (a) on the return.

PROFIT AND LOSS FROM BUSINESS, BY INDUSTRIAL GROUPS, RETURNS WITH NET INCOME OF \$5,000 AND OVER

The profit and loss from business (other than from partnerships) reported on returns, Form 1040, with net income of \$5,000 and over, are classified in the following table according to nature of business.

For returns with information on schedule A, there are shown the number of businesses with profit and with loss, total receipts, salaries and wages paid, and the amount of profit and loss. For returns with business but without information on schedule A, and for all returns with business, there are presented the number of businesses with profit and with loss and the amount of profit and loss. These data represent only such amounts reported by individuals as sole proprietors, and do not necessarily indicate the principal occupation of the individual nor the total income reported on the return.

In the tabulation of sources of income from individual returns the classification "business profit" represents items of profit reported on the returns, as shown by the total receipts from business or profession, less cost of goods sold and other business deductions, such as salaries, interest on business indebtedness, taxes on business or business property, losses from fire or storm, bad debts arising from sales; depreciation, obsolescence and depletion, rents, repairs, and other expenses as provided for in schedule A of the individual income tax returns, Form 1040. The "business loss" represents items of loss from business which occur when deductions exceed the total receipts, as

reported on the returns.

Profit and loss from business (other than from partnerships) by industrial groups, in Schedule A, number of businesses with profit and loss, total receipts, salaries but without Schedule A and for all returns with business, number of businesses for prior years

Basic table 8, pages 93-101, contains, for each industrial group, a frequency distribution of the number of returns with business and the amount of profit and loss from business by size of profit and loss.

The table on pages 24–25 and basic table 8 exclude (1) income from partnerships reported in item 5 on face of return, Form 1040 (see p. 146), (2) salaries, wages, fees, commissions, etc., reported in item 1 on face of return, and (3) business profits and losses reported on returns with net income of less than \$5,000.

WHOLLY AND PARTIALLY TAX-EXEMPT OBLIGATIONS, RETURNS WITH NET INCOME OF \$5,000 AND OVER

Wholly tax-exempt obligations consist of securities the interest on which is wholly exempt from the normal income tax and surtax of the Federal Government. Partially tax-exempt obligations comprise securities the interest on which is exempt from the normal income tax of the Federal Government and certain issues on which the interest on the principal amount up to \$5,000 is also exempt from surtax. During the calendar year 1935, the wholly tax-exempt obligations on which interest was paid consisted of (1) obligations of the Federal Government: bonds issued on or before September 1, 1917, First Liberty 3½ percent bonds, Treasury bills, Treasury certificates of indebtedness, Treasury notes, securities issued under the Federal Farm Loan Act, or such act as amended, (2) obligations of a State, Territory, or political subdivision thereof, or the District of Columbia, and (3) obligations of United States possessions. Partially tax-exempt obligations were Liberty 4 and 4¼ percent bonds, United States savings bonds, Treasury bonds, and obligations of instrumentalities of the United States other than obligations issued under Federal Farm Loan Act, or such act as amended.

The amount of such interest received on a principal amount in excess of exemption of \$5,000, which is reported on the face of the return for tax computation, is tabulated in "Taxable interest on partially tax-exempt Government obligations" in the text table on p. 10 and basic table 7 on pp. 88-92.
<sup>4</sup> Includes interest received on obligations of instrumentalities of the United States other than obligations is send under Federal Ferral Loan Act, or such act as amounded. (See line (f), column 3, schedule D. Form

issued under Federal Farm Loan Act, or such act as amended. (See line (t), column 3, schedule D, Form 1040, p. 146.) The amount of such interest received, which is reported on the face of the return for tax computation, is tabulated in "Taxable interest on partially tax-exempt Government obligations" in the text table on p. 10 and in basic table 7 on pp. 88-92.

<sup>&</sup>lt;sup>8</sup> Under \$500.

The tabulation presented herewith shows, for returns with net income of \$5,000 and over, the wholly and partially tax-exempt obligations owned as of the end of the year, and the total wholly and partially tax-exempt interest received or accrued during the year, segregated by nature of obligation and by net income classes. Bond holdings frequently vary materially during the year, therefore, the amount of bonds reported as of the end of the year may include bonds for which no interest was received or accrued, and, vice versa, the interest reported may include interest on bonds which have been sold prior to the end of the year.

Moreover, in some cases where the income is received through partnerships and fiduciaries, interest is reported for which no corresponding principal amount owned, representing the pro rata share of the member of the partnership or beneficiary of the estate or trust in the principal owned by the partnership or estate or trust, is reported.

Schedule D, Form 1040, from which this table is prepared, is a supplementary informational schedule and frequently is not completely filled out. Therefore, the amount of interest in excess of exemption may not correspond to the amount of taxable interest on Liberty bonds, etc., reported on the face of the return for tax computation.

This year, for the first time, data for the partially tax-exempt United States savings bonds are tabulated with the Liberty 4 and

4¼ percent bonds and the Treasury bonds.

### RETURNS ON FORM 1040 WITH NO NET INCOME

As noted on page 1, the general tables for individual returns in Statistics of Income do not include data from returns which show no net income. Such returns, in most instances, are filed in accordance with the statutory requirements that every individual with gross income of \$5,000 and over, irrespective of the amount of net income or deficit, file an income tax return. Tabulations prepared from these returns by deficit classes and by sources of income and deductions are shown below. The distribution of the returns by States and Territories and more detailed tabulation of the sources of income and deductions, by deficit classes, are shown in basic tables 10 and 11, pages 127–128.

Excludes amounts reported in schedules A and B as business deductions.

### NUMBER OF RETURNS BY COUNTIES, CITIES, AND TOWNS

The statistics showing the number of individual income tax returns for 1935 by counties, cities, and towns having a population of 1,000 and over are issued in a separate mimeographed bulletin entitled "Individual Income Tax Returns for 1935-Number of Returns by States, by Counties, and by Cities and Towns," which was released in May, 1937. Copies may be secured from the Bureau of Internal Revenue, Washington, D. C., upon request. Information on net income and tax liability on individual income tax returns is not tabulated for smaller civil divisions than States and Territories.

### PARTNERSHIP RETURNS OF INCOME

Partnership returns, except for the war excess-profits tax of 1917, are not subject to direct assessment. The partnership net income, whether distributed or not, or the net loss, is reported on the individual returns of the copartners according to their shares. A partnership return of income (Form 1065, see p. 152) is, however, required to be filed.

The number of partnership returns filed for 1917 through 1935 is as follows:

Year:		Year:	Number
1917	31, 701	1927	282, 841
1918			272, 127

### HISTORICAL SUMMARIES (INDIVIDUAL RETURNS)

A résumé of the individual income tax returns for each of the years since the inception of the present period of income taxation, showing number of returns, net income, and tax, by net income classes, also sources of income and deductions, is shown in the following tables.

Summary figures for individual returns by States and Territories for the years 1925 through 1935, showing number, net income, and tax, are tabulated as a section of basic table 9, pages 102–126.

¹ Changes in the revenue acts affecting the comparability of statistical data from income tax returns of individuals are summarized on pp. 132-139. The returns for 1913 are omitted, as they pertain only to the last 10 months of that year. Data for returns of net income under \$5,000 are estimated on basis of sample for 1918 through 1927 and for 1929; and partly estimated and partly tabulated 1928, 1930, and subsequent years. ² Excludes 7,635 returns of married women making separate returns from husbands. In 1916 the net income on returns filed separately by husband and wife is combined and the total appears as one return. In all other years the returns of married women filed separately are included in their individual income classes independently of the husband's income.

individuals are summarized on pp. 132-139. The income items for 1916 are "Gross income," the deductions not having been allocated to the various sources but included in aggregate under "Deductions." Beginning 1917, the income items are "not income," the deductions allocable to the various sources but included in aggregate under "Deductions." Beginning 1917, the income items are "not income," the deductions allocable to the various sources of income being applied against the gross income from the specific sources as reported on the schedules in the income tax returns. When not losses are shown on the schedules, such not losses are transferred in tabulation to "Deductions" which also include the other unallocated items shown on the return under "Deductions." Data for returns of not income under \$5,000 are estimated on basis of sample for years 1918 through 1927 and for 1929; and partly estimated and partly tabulated 1928, 1930, and subsequent years.

2 Excludes data for 1,640,755 returns with not income under \$2,000 and aggregate net income of \$2,461,137,000.

3 Excludes beginning 1924 wages and salaries of the individual, his wife, or dependent minors derived from the business conducted by the individual. Prior to 1924 such wages and salaries were reported as income under "Wages and salaries." Prior to 1927 includes taxpayer's earned income from a partnership. Includes "Professions and vocations" in 1916.

4 Revised. For taxable returns filed in Alabama with not income under \$5,000 the revised figures are: Salaries, wages, etc., \$101,825,123; Business, \$22,051,392; Partnership, \$15,640,817; and Interest and other income, \$7,973,290. 1 Changes in the revenue acts affecting the comparability of statistical data from income tax returns of individuals are summarized on pp. 132-139. The income items for 1916 are "Gross income," the deductions

### ESTATE TAX RETURNS

The estate tax is imposed upon the transfer of the net estate in its entirety and not upon any particular legacy, devise, or distributive share. The relationship of the beneficiary to the decedent has no

bearing upon the tax liability.

Estate tax returns were filed during the calendar year 1936 under the provisions of the Revenue Act of 1924 or prior acts, the Revenue Act of 1926, and the combined provisions of the Revenue Acts of 1926 and 1932, 1926 and 1934, and 1926 and 1935. A synopsis of estate tax rates, specific exemption, and credits against tax under the Revenue Acts of 1916 to 1935, inclusive, is presented on pages 140–141.

An estate tax return is required under these revenue acts in the case of every citizen, regardless of place of residence, or resident (only in case of every resident if the decedent died prior to May 11. 1934, the effective date of the Revenue Act of 1934), whose gross estate, as defined in the statutes, exceeds the specific exemption The specific exemption is \$50,000 under the Revenue Act of 1924 and prior acts, \$100,000 under the Revenue Act of 1926. \$50,000 for the purpose of the additional estate tax under the Revenue Acts of 1932 and 1934, and \$40,000 for the purpose of the additional estate tax under the Revenue Act of 1935. A return is required in the case of every nonresident alien (or every nonresident citizen and alien if the decedent died prior to May 11, 1934, the effective date of the Revenue Act of 1934) any part of whose estate, regardless of value, was situated at date of death in the United States, within the meaning of the statute.

Prior to the effective date of the Revenue Act of 1935 (August 31, 1935) returns were required to be filed within 1 year after date of death, while under the Revenue Act of 1935 returns are required to be filed within 15 months after date of death. Under certain conditions further extensions of time are granted for filing. In determining the value of the gross estate under the 1935 Act the executor may elect either the date of the decedent's death or the date one year after the decedent's death, or in the case of property distributed, sold, exchanged, or otherwise disposed of during the year following death, as of the date of the distribution, sale, exchange, or other disposition. Under former revenue acts the value of the gross estate was determined as of the date of death.

The gross estate as defined by law includes certain transfers, such as those made in contemplation of death or intended to take effect at or after death. The net estate is the amount of the gross estate less (1) the sum of the authorized deductions, and (2) the specific exemption allowed in the case of citizen or resident decedents (prior to the enactment of the Revenue Act of 1934, exemption allowed for resident

decedents only).

Returns for estates of decedents who died prior to 10:25 a.m., February 26, 1926, are filed under revenue acts passed prior to that date and returns for estates of decedents who died during the period 10:25 a.m., February 26, 1926, through 4:59 p.m., June 6, 1932, are filed under the Revenue Act of 1926. Estates of decedents who died subsequent to the effective date of the Revenue Act of 1932 (5 p.m., June 6, 1932) are subject to two estate taxes, the tax levied under the provisions of the Revenue Act of 1926 and an additional estate tax imposed by the

Revenue Act of 1932, or by that Act as amended by the Revenue Acts of 1934 and 1935. The tax under the Revenue Act of 1926 applies to net estates after deduction of a specific exemption of \$100,000 and tax credits are allowed for estate, inheritance, legacy, or succession taxes paid to any State. Territory, or the District of Columbia not to exceed 80 percent of the Federal estate tax, and for gift taxes paid to the Federal Government. The additional estate tax applies to net estates after deduction of a specific exemption of \$50,000 under the 1932 and 1934 Revenue Acts, and \$40,000 under the 1935 Act, and is equal to the excess of (1) the amount of a tentative tax computed at the rates specified in the act which is in effect over (2) the amount of the tax computed at rates in the Revenue Act of 1926 before deduction of the tax credits provided. The rates of the tentative tax under the Revenue Act of 1932 were graduated from 1 percent upon net estates not in excess of \$10,000 to 45 percent upon the amount in excess of \$10,000,000. Under the Revenue Acts of 1934 and 1935 the rates of the tentative tax were increased, reaching a maximum rate under the 1935 Act of 70 percent on the amount of net estate in excess of \$50,000,000.

The Revenue Act of 1924 allows a tax credit not to exceed 25 percent of the Federal estate tax (after deduction of any credit for gift tax imposed by the Revenue Act of 1924) for estate, inheritance, legacy, or succession taxes paid to any State, Territory, or the District of Columbia, in respect of any property included in the gross estate. Prior to the Revenue Act of 1924 this tax credit was not allowed. Under the Revenue Act of 1926, this tax credit is increased to an amount not to exceed 80 percent of the Federal estate tax. No credit for estate, inheritance, legacy, or succession taxes is allowable against the additional estate tax imposed by the Revenue Act of 1932, or by that Act as amended. Credit for gift tax imposed by the provisions of the Revenue Act of 1924 is allowable against estate tax payable under the Revenue Act of 1924 or the Revenue Act of 1926 with respect to so much of the property which constituted a gift as is included in the decedent's gross estate. For decedents who died subsequent to the effective date of the Revenue Act of 1932, a tax credit for gift taxes paid to the Federal Government is allowed both against the tax computed under the Revenue Act of 1926 and against the additional tax computed under the Revenue Act of 1932, 1934, or 1935.

The tables are based on the returns as filed and prior to any adjustments that may be determined upon investigation and audit. The tax liability reported does not correspond with the actual receipts of

taxes during the period for the reason that payments may be made at a later date than the filing of the return, and for the reason that field investigation and office audit may disclose deficiency taxes or

excess payments which are not reflected in these tables.

Data included in these tables are compiled from returns filed during the calendar year 1936, irrespective of the date of death of the decedent, under revenue acts passed prior to 1926, the Revenue Act of 1926 only, and the combined provisions of the Revenue Acts of 1926 and 1932, 1926 and 1934, or 1926 and 1935. In order to maintain comparability with the method of tabulation for preceding years, the data for taxable returns of decedents who died after the effective date of the Revenue Act of 1926 are classified by net estate classes which correspond to the successive tax brackets specified in the Revenue Act of 1926 on the basis of the net estate under the provisions of that act rather than the provisions of the 1932, 1934, or 1935 acts.

The total number of estate tax returns filed during the calendar year 1936 is 13,321, and the total tax liability is \$196,370,000 (see table 9, p. 64). The number of returns for citizens or residents is 11,605, of which 9,137 are taxable returns and 2,468 are nontaxable returns. The tax liability on the 9,137 taxable returns is \$195,301,000. As compared with returns filed during the previous year, the number of taxable returns for citizens or residents increased by 482, or 5.6 percent, and the tax liability on such returns increased \$41,538,000.

or 27.0 percent.

In table 1, which is in the nature of a summary statement, the taxable and nontaxable returns for citizens or residents are classified according to the various revenue acts under which the returns were filed, and the number of returns, gross estate, deductions, net estate,

and tax liability are shown for each group of returns.

In tables 2 through 7, the data for the taxable returns in table 1 are presented in more detail. Tables 2, 3, and 4 include the items of gross estate and deductions and tables 5, 6, and 7 include the items of net estate and tax liability. The taxable returns for resident decedents who died prior to May 11, 1934, are presented in tables 2 and 5, the taxable returns for citizen or resident decedents who died during the period May 11, 1934, through August 30, 1935, are presented in tables 3 and 6, and the taxable returns for citizen or resident decedents who died on or after August 31, 1935, are presented in tables 4 and 7.

Table 8 presents a distribution by States of the returns of citizen or resident decedents and table 9 is a historical summary of all estate

tax returns filed.

## GIFT TAX RETURNS

There are presented herein tables compiled from data reported on gift tax returns for 1935, filed during 1936. The provisions of the Revenue Act of 1934 apply to gifts made during the calendar year This Act imposes a tax, payable by the donor, upon the transfer of property by gift made subsequent to June 6, 1932, at rates graduated from three-fourths of 1 percent upon net gifts of less than \$10,000 to 45 percent on the amount in excess of \$10,000,000. Any individual citizen or resident of the United States who makes any transfer by gift which exceeds \$5,000 in value to any one donee, or regardless of value if the gift consists of a future interest, must file a gift tax return. A nonresident alien is similarly required to file a return if the gift consists of property situated in the United States.

The rates of tax in force for the calendar year for which the return is filed are applied, first, to the cumulative net gifts made from June 6. 1932 (the date of the enactment of the Revenue Act of 1932), through the end of the calendar year for which the return is filed. tax so determined there is deducted an amount computed by applying the same rates to the cumulative net gifts made up to the beginning of such calendar year. The balan year for which the return is filed. The balance is the tax liability for the calendar

The following tables show form of property in which gifts were made by net gift classes; also number of returns, total gifts before exclusions, exclusions, total gifts after exclusions, deductions, net gifts, and tax, classified by net gift classes, by total gift classes, and

by taxable and nontaxable returns.

The data presented are based on the returns as filed and prior to any revision that may subsequently be made as the result of audit by the Bureau of Internal Revenue. The tax liability shown in the tables does not correspond with the actual collections for the same period. as payment of the tax shown on the returns is at times deferred, and for the further reason that any deficiency taxes or overassessments disclosed by the audit are not reflected.

In the tables, the term "total gifts" represents the value of the property transferred less any money consideration received in exchange, provided a donative intent existed. The tax is imposed upon the net gifts which are obtained by subtracting from the total gifts:

(1) An exclusion of \$5,000 for each donee (except in cases of future

interests);

(2) The included amount of gifts represented by charitable, public,

and similar gifts; and

(3) A specific exemption not in excess of \$50,000 for each resident or citizen donor, all of which may be taken in one year or the amount

spread over a period of years at the option of the donor.

The several forms of gifts, comprising total gifts, have been classified under the headings of real estate, stocks and bonds, cash, insurance, and miscellaneous. The last-named classification includes jewelry, objects of art, copyrights on books, the forgiveness of debts, interest in business, the assignment of a judgment, the assignment of benefits of a contract of insurance, etc. Gifts of stocks and bonds comprise 73.2 percent of total gifts, gifts of cash amount to 8.7 percent, real estate 7.1 percent, miscellaneous gifts 6.3 percent, and insurance 4.7 percent. Gifts for charitable, public, and similar purposes amount to 5.9 percent of the total gifts made.

Slightly less than one-half of the total gifts was effected by trusts. The following table gives, for each form of property, the total gifts, amount by trust, and all other gifts:

<sup>&</sup>lt;sup>1</sup> Total gifts before subtracting exclusions and before deducting charitable public and similar gifts and specific exemption.
<sup>2</sup> Net gifts after exclusions and deductions.

<sup>2</sup> Total charitable public and similar gifts after total exclusions for such gifts not exceeding \$5,000 for each done (except future interests).

<sup>4</sup> A specific exemption of \$50,000 is allowed each resident or citizen donor. At the option of the donor, amount may be taken in one year or spread over a period of years.

Tables are continued in the following pages, exhibiting in greater detail information from individual income tax returns.

There is also included a synopsis of individual income and profits tax rates, estate and gift tax rates, credits, and exemptions affecting

the comparability of the data in the Statistics of Income.

Statistics from the corporation income and excess-profits tax returns and personal holding company returns for 1935 are being prepared and will be issued under the title "Statistics of Income for 1935, Part 2."

Respectfully,

Guy T. Helvering.
Commissioner of Internal Revenue.

John W. Hanes, Acting Secretary of the Treasury.

<sup>2</sup> An unequal number of separate returns of husbands and wives results from the use of the sample method for returns with net income of under \$5,000 as the net income of one spouse may be \$5,000 or over and that of the other spouse under \$5,000 (see discussion of sample, p. 2).

<sup>1</sup> Nontaxable returns. Specific exemptions from normal tax and surtax exceed net income. A negligible number of nontaxable returns in net income classes of \$5,000 and over is not tabulated separately.

2 An unequal number of separate returns of husbands and wives results from the use of the sample method for returns with net income of under \$5,000, as the net income of one spouse may be \$5,000 or over and that of the other spouse under \$5,000 (see discussion of sample, p. 2).

<sup>2</sup> For explanation of changes in 1934 Act affecting net capital gain and net capital loss, see text, pp. 7-8, and synopsis of laws, pp. 133-139.
<sup>3</sup> Interest received on Liberty 4 and 4½ percent bonds. United States savings bonds, and Treasury bonds owned in excess of \$5,000 and on obligations of certain instrumentalities of the United States is subject to surtax if the surtax net income is over \$4,000. (See items 9 and 25, Form 1040, p. 146.)

<sup>4</sup> The number of returns is not available, since the amount of "other income" is determined by subtracting the sum of specific sources of income from total income, and "other deductions" is determined by subtractive the surface of 
ing the sum of specific deductions from total deductions.

Excludes amounts reported in schedules A and B as business deductions.

6 Not available.

7 Less than \$500.

8 Classes grouped to conceal identity of taxpayer.

Excludes returns with net income of under \$5,000.

10 Taxable interest received on partially tax-exempt Government obligations reported on returns with net income under \$5.000 is tabulated with "other taxable interest."

Includes taxable interest received on partially tax-exempt Government obligations reported on returns with net income under \$5,000.

<sup>1</sup> Nontaxable returns. Specific exemptions from normal tax and surtax exceed net income. A negligible number of nontaxable returns in net income classes of \$6,000 and over is not tabulated separately.

2 Classes grouped to conceal identity of taxpayer.

1 Changes in the revenue acts affecting the comparability of statistical data from income tax returns of Individuals are summarized on pp. 132-139.

\*\* Husband and wife each to file a return unless combined income is included in joint return.

Net income means "statutory" net income, i. e., the excess of gross income over deductions as defined the various revenue acts. Net income has been adjusted from time to time as follows:

in the various revenue acts.

(a) Amortization of buildings, machinery, equipment, or other facilities constructed or acquired on or after April 6, 1917, for the production of articles contributing to the prosecution of the war is included to a reasonable amount in business deductions, 1918 through 1921.

(b) Contributions to charitable and scientific organizations, etc., not exceeding 15 percent of the net lncome before deducting the contributions, are deductible for 1917 and subsequent years. (For unlimited deduction of contributions see sec. 214 (10), Revenue Acts of 1924 and 1926, and sec. 120, Revenue Act of 1928,

deduction of contributions see sec. 214 (10), Revenue Acts of 1924 and 1926, and sec. 120, Revenue Act of 1928, and subsequent acts.)

(a) Losses sustained in transactions entered into for profit but not connected with business or trade are not deductible, 1913 through 1915. For 1916 and 1917 such losses are deductible to the extent of the aggregate income from such transactions; for 1918 through 1931, such losses are wholly deductible, excepting that for the years 1924 through 1933 the loss, if incurred through the sale of capital assets held for more than 2 years, is deductible from total tax to the extent of 12½ percent of the loss. (See table C. p. 139.) For the years 1932 and 1933 losses from sales or exchanges of stocks or bonds (other than capital assets held for more than 2 years, and other than bonds issued by a government or political subdivision thereof) are allowed only to the extent of the gains from such sales or exchanges. The Revenue Act of 1932 provides that any excess less thus discultance any nutsed without regard to any losses sustained during the preceding taxable year is to the extent of the gains from such sales or exchanges. The Revenue Act of 1932 provides that any excess loss thus disallowed, computed without regard to any losses sustained during the preceding taxable year, is, to an amount not in excess of the taxpasey's net income for the taxable year, considered as loss sustained in the succeeding taxable year from sales or exchanges of stocks or bonds other than capital assets. (See sec. 23 (r) (2), Revenue Act of 1932.) However, section 218 (b) of the National Industrial Recovery Act repeals, effective as of Jan. 1, 1933, section 23 (r) (2) of the Revenue Act of 1932, thereby limiting the application of losses from the sale or exchange of stocks or bonds (other than capital assets) to gains from similar transactions during the same taxable year and prohibiting the carrying forward and application of such losses to gains from similar transactions in the succeeding taxable year. Under the Revenue Act of 1932, the limitation on the deduction of losses from sale or exchange of stocks or bonds does not apply to persons dealing in securities or carrying on the banking business. (See sec. 23 (r) (3), Revenue Act of 1932.) However, section 218 (c) of the National Industrial Recovery Act amends, effective as of Jan. 1, 1933, section 23 (r) (3) of the Revenue Act of 1932, by removing the exemption from the stock-loss limitation allowed to persons carrying on the banking business, thereby limiting the application of losses from the sale or exchange of stocks or on the banking business, thereby limiting the application of losses from the sale or exchange of stocks or bonds (other than capital assets) to gains from similar transactions, and prohibiting the use of such losses to reduce income from other sources. Section 218 (d) of the National Industrial Recovery Act also amends, effective as of Jan. 1, 1933, section 182 (a) of the Revenue Act of 1932 by removing the privilege of individual

members of a partnership to reduce their individual net incomes by their proportionate shares of a net loss incurred by the partnership through the sale or exchange of stocks or bonds (other than capital assets). By the Revenue Act of 1934 the definition of capital assets is broadened to include all property held by taxpayer, whether or not connected with trade or business regardless of period held, except stock in trade, property which would be included in inventory, or property held for sale in ordinary course of business or trade. For 1934 and subsequent years capital losses are computed on the basis of certain percentages which vary according to the period for which assets have been held, and deduction of capital losses (after the percentages are applied) is limited to \$2,000 after subtracting gains from such sales (such deduction not to exceed the final net loss from such sales after the percentages are applied). (For method of computing capital gains and losses, see table C, p. 139.) The Revenue Act of 1934 allows losses from wagering transactions only to the extent of the gains from such transactions, and denies deductions for losses from sales or exchanges of property, directly or indirectly, hetween members of a family and (except in case of distributions in liquidation) between an individual and a corporation in which such individual owns, directly or indirectly, more than 50 percent in value of the outstanding stock. (See sec. 24 (a) (6), Revenue Act of 1934.)

(d) Net loss for prior year resulting from the operation of any trade or business regularly carried on by the taxpayer: In the case of a net loss for any taxable year beginning after Oct. 31, 1918, and ending prior to Jan. 1, 1929, the Revenue Act of 1918 provides for the deduction of such loss from net income of the preceding year, a redetermination of taxes for the preceding year being made. When the net loss acceeds the net income for the preceding year, the amount of such excess is to be allowed in the next succeeding taxable year. The Rev members of a partnership to reduce their individual net incomes by their proportionate shares of a net loss

is no provision in the Revenue Act of 1934 for deduction of net loss for prior year.

Net income subject to normal tax is all net income after deducting the sum of

Nonresident aliens are allowed the personal exemption (\$1,000 if single, \$2,000 if married) and the credit for each dependent (\$200) only when the country of which nonresident alien is a citizen, either imposes no income tax or allows similar credit to citizens of the United States not residing within such foreign country.

Tax for 1923 reduced 25 percent by credit or refund under section 1200 (a) of the Revenue Act of 1924.

For net incomes in excess of \$5,000, personal exemption is \$2,000.

For 1922 and subsequent years, if nonresident alien is resident of contiguous country (Canada or Mex-

From estimate a new were not anowed to deduct meeting takes paid to foleigh countries, ettief as a tax credit or in general deductions for the years 1918, 1919, and 1920.

Beginning with 1921, the credit cannot exceed the proportion of the total tax against which the credit is taken, that the tax payer's net income from sources without the United States bears to the entire net income. This credit does not apply to nonresident aliens nor to citizens deriving a large portion of their gross income from sources within a possession of the United States, but to such persons these taxes are allowable as a deduction from gross income, if imposed upon income from sources within the United States. For the years 1921 through 1931, the amount of income and profits taxes paid to foreign countries or United States possessions, in excess of that deducted as a tax credit, is permitted to be included in deductions against gross income. oss income. Rates for computation of additional tax—additional tax is amount by which tax computed according to rates of Revenue Act of 1932 (or 1932 as amended) exceeds tax computed according to rates of Revenue Act of 1926. 1 An estate tax return is required for every resident decedent (on and after May 11, 1931, for every citizen decedent, regardless of place of residence) whose gross estate as defined in the statutes, exceeds the specific exemption allowed. A return is also required for every nonresident decedent (on and after May 11, 1934, for every nonresident alien decedent) any part of whose estate, regardless of value, was situated at date of death in the United States, within the meaning of the statute. The returns are required to be filed within one year after date of death, except for decedents who died after Aug. 39, 1935, for whom returns are due 15 months after date of death.

3 Specific exemption of \$100,000 is allowed in case of nonresident citizen decedent dying on and after May 11, 1934, under 1926 Act as amended by 1934 Act.

#### PART 2

# CORPORATION INCOME AND EXCESS-PROFITS TAX RETURNS AND PERSONAL HOLDING COMPANY RETURNS

TREASURY DEPARTMENT. OFFICE OF COMMISSIONER OF INTERNAL REVENUE. Washington, D. C., September 23, 1938.

Sir: In accordance with the provision in the Revenue Act of 1916 and subsequent acts requiring the publication annually of statistics with respect to the operation of the income, war-profits, and excessprofits tax laws, I have the honor to transmit herewith a report entitled "Statistics of Income for 1935, Part 2," prepared from corporation income and excess-profits tax returns and personal holding company returns for 1935 filed during 1936, with a historical presentation of the income and of the tax liability reported by corporations from 1909 to date. (Statistics compiled from individual income tax returns for 1935, and estate tax returns and gift tax returns filed during 1936, are published in Statistics of Income for 1935, Part 1.)

## CORPORATION INCOME AND EXCESS-PROFITS TAX RETURNS

#### RETURNS TABULATED

In general, the corporation income and excess-profits tax returns covered by this report are for the calendar year 1935. However, a considerable number of returns are filed for a fiscal year other than the calendar year. The returns for a fiscal year ended in the period July, 1935, through June, 1936, are tabulated with the calendar year returns. There are also included part-year returns for which the greater part of the accounting period falls in 1935.

The returns for 1935 are filed under the provisions of the Revenue Act of 1934. The major changes made by this act affecting the tabulated data for corporations are set forth in the section of this report entitled "Revenue Acts of 1913–1934 and certain tax provisions of the National Industrial Recovery Act (1933); also the special excise tax under the Act of August 5, 1909," pages 101–105.

The general tables for corporations include, in addition to aggregates for all returns, tabulations for returns with net income and with no net income. The statistics are taken from returns as filed and prior to any revision or adjustment that may subsequently be made as a result of audit by the Bureau of Internal Revenue.

#### DEFINITIONS OF GROSS INCOME, DEDUCTIONS, AND NET INCOME

In this report "gross income" corresponds to "total income" reported in item 14 on the face of the return for 1935, plus "cost of goods sold" and "cost of operations," items 2 and 5, less "interest on Liberty bonds, etc.," item 11. This last item has been deducted from "total income," as this item was not included in "gross income" for prior years. "Deductions" correspond to "total deductions" reported in item 26 on the face of the return for 1935, plus "cost of goods sold" and "cost of operations," items 2 and 5. All negative income reported on the returns under sources of income are transferred to deductions and both "gross income" and "deductions" are increased by a like amount. "Net income" in this report means the amount of income subject to income tax (item 30 on the face of the return) and represents the amount of gross income, as defined above, in excess of deductions; and "deficit" represents excess of deductions over gross income. References to item numbers on the return relate to Form 1120, facsimile of which appears on pages 110–115.

#### TAX LIABILITY AND COLLECTIONS

The amount of tax liability as reported on the returns is not precisely comparable with the amount of corporate income tax collections during the calendar year in which the returns are filed. Several factors are responsible for the difference in the taxes collected and the tax liability reported on the returns, among which are the following:

1. The amount of tax originally reported may have been subsequently revised as the result of audit of the returns. The revisions may result in additional assessments, thereby increasing the tax liability, or in certificates of overassessment, representing abatements and credits, which reduce the tax liability originally reported. An amended return has the same effect as an audit revision.

2. Income and profits taxes paid to foreign countries or possessions of the United States may be taken as a deduction from gross income or applied with certain limitations as a credit against the income tax payable to the United States. The amount of such taxes taken as a credit by corporations against the income tax liability to the United States has not been deducted from the amount of income tax liability shown in the tabulations in this report. It is tabulated for the years 1925 through 1935 however, on page 8.

3. Because of being assessed against the debtor corporation, income tax paid at source on tax-free covenant bonds is included in the corporation income tax collections, notwithstanding the fact that it is paid on behalf of individual holders of bonds.

4. The amount of tax liability on fiscal year returns may not represent taxes collected during the calendar year in which the returns are filed. Fiscal year returns are required to be filed on or before the 15th day of the third month after the end of the fiscal year, and payment, as in the case of calendar year returns, is required at the time the return is filed, or in four quarterly installments. The first of the quarterly installments is due when the return is filed. Thus during the calendar year 1936, collections were made of part or all of the taxes reported on returns for fiscal years ended in period Janu-

ary 31, 1935 (the last quarterly installment payment on which was due on or before January 15, 1936), through September 30, 1936 (the filing of returns and the full payment or first installment payment on which was due on or before December 15, 1936); whereas there are excluded from the statistics in this report, as previously indicated, the returns for fiscal years ended prior to July, 1935, and subsequent to June, 1936.

5. Delays in payment due to financial embarrassment, liquidation of business, or any other cause, result in collections of taxes after the close of the year in which such taxes are due, and the classification of such collections as "back taxes" because made in a subsequent year. For similar reasons, certain amounts are uncollectible.

6. Collections in the current year include such interest and penalty items as are received in connection with delinquent payments on

returns.

#### INDUSTRIAL CLASSIFICATION

Corporations are classified industrially according to their predominant business. The industrial groups, therefore, do not contain solely corporations engaged exclusively in the industries in which they are classified, because of the diversified activities of many corporations. The industrial classification for 1934 and 1935 is not strictly comparable with that for prior years, by reason of the discontinuance, under the Revenue Act of 1934, of the privilege of filing consolidated returns, except by railroads. Whereas returns formerly filed on a consolidated basis were classified according to the predominant business of the consolidated group, the industrial classification for returns with years ended December 31, 1934, or thereafter, is based on the predominant business of each company (except in the case of an affiliated railroad group which exercises the privilege of filing a consolidated return). Although the present classification is a purer industrial distribution than was possible for consolidated returns of affiliated groups of companies in years prior to 1934, it does not yield a wholly clean-cut separation of industries, because of the varied activities of particular corporations, already mentioned.

### GEOGRAPHIC DISTRIBUTION

The data, although tabulated by the States in which the returns were filed, do not represent what may be called the geographic distribution of income. There is no way of ascertaining from the income tax returns the amount of income originating in the respective States or the amount of tax paid on that basis, since income reported by a corporation in one State may have been derived from sources in other States. Returns are filed in the collection district in which the principal place of business or principal office of the corporation is located, with the two exceptions that consolidated returns of affiliated groups of railroad companies are filed in the collection district of the parent company and that the separate returns of affiliated groups of companies which formerly filed on a consolidated basis may or may not be filed in the same collection districts as heretofore. The geographic distribution of the returns for the years prior to 1934 is, therefore, not strictly comparable with that for 1934 and 1935.

## COMPARABILITY WITH PREVIOUS REPORTS

In various sections of this report reference is made to conditions affecting the comparability of specific items from year to year, such as changes in the provisions of the revenue acts under which the returns for given years are filed. In particular it must be noted that the data for 1934 and 1935 are not strictly comparable with those for prior years. The totals as well as the separate items of assets, liabilities, receipts and deductions, the amounts of dividend payments, gross income, net income and tax, and the classifications of the returns by industry, geographic location, size of total assets, and returns with net income and with no net income are all affected by the discontinuance, under the Revenue Act of 1934, of the privilege of filing consolidated returns, except by railroads. The lack of comparability of the information for 1934 and 1935 with that published in Statistics of Income for 1933 and prior years is more fully discussed in Statistics of Income for 1934, Part 2, Corporation Income and Excess-Profits Tax Returns and Personal Holding Company Returns, pages 19–29.

#### NUMBER OF RETURNS, NET INCOME OR DEFICIT, AND TAX

The number of income tax returns filed by c rporations for 1935 was 533,631, as against 528,898 for 1934. Of the total number of 1935 returns, 164,231 show net income, 312,882 no net income, and 56,518 no income data. The returns with net income show an aggregate net income of \$5,164,723,225, income tax of \$710,155,678, excess-profits tax of \$24,968,692 (of which \$19,584 is reported on returns with no net income), and total tax of \$735,124,370. The number of returns with net income increased 19,130, or 13.2 percent, as compared with 1934 returns, and the net income increased \$889,525,954, or 20.8 percent. The income tax increased \$121,780,313, or 20.7 percent; the excess-profits tax \$17,295,934, or 225.4 percent; and the total tax \$139,076,247, or 23.3 percent. The number of returns with no net income decreased 11,821, or 3.6 percent, as compared with similar 1934 returns, and the reported deficit of \$3,468,773,525 represented a decrease of \$712,253,961, or 17.0 percent.

#### MAJOR INDUSTRIAL GROUPS

The following table, in which returns of corporations are classified by major industrial groups and by returns with net income, with no net income, and with no income data, inactive corporations, shows number of returns, gross income, deductions, net income or deficit, and tax liability. Basic table 1, pages 32–33, show similar data for the returns distributed by States and Territories in place of by major industrial groups.

In analyzing the data compiled from returns classified under the major industrial group "Finance" and under the industrial subgroup "Life insurance—Mutual or stock companies," allowance should be made for the two special deductions from gross income permitted life insurance companies under paragraphs (2) and (4), subsection (a), section 203, Revenue Act of 1934, relating to reserve funds required by law and reserve for dividends. For returns with net income these

deductions total \$36,077,136; for returns with no net income, \$695,-595,958. In basic tables 3 and 4, pages 40-51 and pages 52-59, respectively, the special deductions for life insurance companies are included in "other deductions."

INCOME AND PROFITS TAXES PAID TO FOREIGN COUNTRIES OR POSSESSIONS OF THE UNITED STATES REPORTED AS A TAX CREDIT

That portion of the income and profits taxes paid foreign countries or possessions of the United States which was reported for tax credit by domestic corporations for the years 1925 through 1935 is shown below. These amounts, although tax credits, are not deducted from the income tax liability shown in the tables in this report (see paragraph numbered 2, p. 2). The amounts of the income and profits taxes paid to foreign countries or United States possessions which were reported in deductions from gross income are not tabulated separately but are included in the item "taxes paid other than income tax."

The Revenue Act of 1934 provides that a domestic corporation may credit income and profits taxes paid to foreign countries or United States possessions against its income tax liability to the United States or may include such taxes in deductions from gross income. When used as a credit, the amount can not exceed the proportion of the total tax against which the credit is taken that the taxpayer's net income from sources without the United States bears to the taxpayer's entire net income; but when reported in deductions from gross income, the total amount of such foreign taxes may be included. For limitations under the various revenue acts affecting the tax credit or the deduction from gross income of income and profits taxes paid to foreign countries or United States possessions, see page 103 in the section of this report entitled "Revenue Acts of 1913–1934 and certain tax provisions of the National Industrial Recovery Act (1933); also the special excise tax under the Act of August 5, 1909."

#### DIVIDENDS PAID

Dividends paid on the capital stock of domestic corporations, as reported on the corporation income tax returns for 1935, are: eash \$5,940,620,077, and stock \$135,851,394. Cash dividends paid increased from 1934 by \$1,081,240,669, or 22.3 percent, and stock dividend payments decreased by \$78,911,375, or 36.7 percent.

Amounts specifically designated as stock dividends in item 15 on schedule L, Form 1120, are tabulated as such. All other dividends (except liquidating) are tabulated as cash dividends, with the result that the latter include dividends paid in other property as well as in cash.

In basic table 1, pages 32-33, the cash and stock dividend payments are exhibited by States for returns with net income and with no net income; in basic table 3, pages 40-51, they are recorded by

major industrial groups for returns in the aggregate as well as for those with net income and with no net income; and in basic table 5, pages 60-65, the amounts reported on returns with balance sheets, grouped by size of total assets, are likewise shown in the aggregate and for the same two subclasses of returns. Cash and stock dividends paid by all corporations, and by corporations with net income and with no net income, for the years 1922 through 1935, are as follows:

F 1 Excludes cash and stock dividends paid by life insurance companies for all years prior to 1928.

\*\* Revised. For 1927, see Statistics of Income for 1928, p. 329. For 1928, the amount of cash dividends paid by corporations reporting net income in the "food products, beverages, and tobacco" group in North Carolina is increased by \$9,000,000. For 1929, see Statistics of Income for 1934. Part, 2, p. 9, footnote 2. For 1930, the amount of cash dividends paid by corporations reporting net income, in the "construction" group, in Pennsylvania, is decreased by \$18,000,000. For 1934, the amount of cash dividends paid by corporations reporting net income and submitting balance sheets with total assets of under \$50,000 (for which consolidated returns were not filed for 1933), in the "finance" group, in Wisconsin, is decreased by \$30,000,000.

For statement of the effect on dividend payments of the discontinuance of the privilege of filing consolidated returns under the Revenue Act of 1934, see Statistics of Income for 1934, Part 2, Corporation Income and Excess-Profits Tax Returns and Personal Holding Company Returns, page 10.

#### COMPILED RECEIPTS AND COMPILED DEDUCTIONS

In the table on page 11 there appears a summary of compiled receipts and compiled deductions for the 477,113 returns of active corporations, with segregation of those submitting and those not submitting balance sheets. Similar statistics for all active corporations without this segregation, by major industrial groups and by returns with net income and with no net income, are presented in basic table 3, pages 40–51. For returns with balance sheets, the same information is given by major industrial groups in basic table 4, and by assets classes in basic table 5, except that in table 4 the figures for corporations with net income and with no net income are not combined. The tables show also compiled net profit (or compiled net loss), net income or deficit, income tax, excess-profits tax, total tax, and compiled net profit after deducting total tax.

Compiled receipts comprise gross sales, gross receipts from operations (where inventories are not an income-determining factor), taxable interest received, net gain from sale of capital assets (real estate, stocks, bonds, etc.), other items grouped as "other receipts," and taxexempt income items of major importance (dividends received on capital stock of domestic corporations and interest on tax-exempt obligations). Compiled receipts differ from gross income, as the two terms are used in this report, only by the amount of the tax-exempt interest included in the former item.

Compiled deductions comprise cost of goods sold, cost of operations, compensation of officers, rent paid on business property, interest paid, taxes paid (excepting income tax and other disallowed taxes), bad debts, depreciation, depletion, net loss from the sale of capital assets (real estate, stocks, bonds, etc.), and items not classified, including amounts of negative income (i. e., transfers of losses reported under income items) grouped as "other deductions." Compiled deductions differ from deductions, as the two terms are used in this report, only by the amount of dividends received on stock of domestic corporations excluded from the former item.

Compiled net profit is the excess of compiled receipts over compiled deductions, and is larger than net income, as the term is used in this report, by the amount of tax-exempt interest and dividends received on stock of domestic corporations. Compiled net loss is the excess of compiled deductions over compiled receipts and is smaller than deficit, as the term is used in this report, by the amount of tax-exempt interest

and dividends received on stock of domestic corporations.

The amounts tabulated as "cost of goods sold" and "cost of operations" (items 2 and 5, respectively, on the face of the return) include salaries and wages, taxes, and depreciation only to the extent that these deductions are reported as part of such costs. Amounts of these items which may be allocable to "cost of goods sold" or to "cost of operations" but which are reported elsewhere on the returns are tabulated under "other deductions," in the case of salaries and wages, and under taxes paid or depreciation in the case of the other two items. If any deduction items other than these three are reported in "cost of goods sold" or "cost of operations," adjustment is made, and the items are transferred to their appropriate classifications.

The deduction item "compensation of officers" excludes the amounts paid to the officers of life insurance companies which file Form 1120L. There is no provision on Form 1120L for reporting this item, and from the annual statement submitted with the return it is not possible to

obtain the compensation of officers separately.

The net loss from sales of capital assets is limited by law to an amount not in excess of \$2,000, after deduction of the gain from such sales. The definition of capital assets, the limitation on net capital loss, and the corporations which are exempt from this limitation, effective for returns with years ended December 31, 1934, and thereafter, are indicated in the section of this report entitled "Revenue Acts of 1913–1934 and certain tax provisions of the National Industrial Recovery Act (1933); also the special excise tax under the Act of August 5, 1909," page 104, footnote 5(c).

#### ASSETS AND LIABILITIES

In the first and second following tables are shown respectively: (1) A summary statement of the principal assets and liabilities as of December 31, 1935, or the close of the fiscal year nearest thereto for 415,205 out of 477,113 returns of active corporations; and (2) the number of returns and the number of balance sheets tabulated, by net income and deficit classes. The difference between the number of returns and the number of balance sheets tabulated represents returns of corporations which did not submit balance sheets, or for which data were fragmentary. In basic table 4, pages 52–59, the principal assets and liabilities are shown by major industrial groups. This table also includes items of compiled receipts and compiled deductions for active corporations which submitted balance sheets. For descriptive statement of compiled receipts and compiled deductions, see pages 9–10.

Balance sheet items not otherwise classified are tabulated under "other assets" and "other liabilities," among which are the following:

Other assets.—Copyrights; formulas; good will; patents; trade marks; sinking funds; other funds; deferred charges; organization expenses; prepaid and suspense items; interest, discount, coupons, and dividends receivable; guaranty deposits, and deposits on contracts, meters, and leaseholds; cash value of life insurance. Other assets of life insurance companies include market value of real estate and bonds in excess of book value; interest, rents, and premiums due; and agents' balances.

Other liabilities.—Deferred and suspense items; funds held in trust; borrowed securities; outstanding coupons and certificates; overdrafts; and all reserves except reserves for bad debts, depreciation, and depletion. Other liabilities of life insurance companies include the net value of outstanding policies and securities, and borrowed money. Other liabilities of banks include deposits (time, saving, demand,

etc.) and bank notes in circulation.

The following changes in classification affect the comparability of asset and liability data over a period of years: Prior to 1929, "investments other than tax-exempt" were included in "other assets" for all corporations; beginning with 1929 they were segregated for corporations other than life insurance; for 1930 and subsequent years, they are segregated for all corporations. Over a period of years shifts appear under liabilities in the amounts reported as "common stock" and "preferred stock," because of variation in reporting these data. For balance sheets in which common and preferred stock are not reported separately, the combined amount is tabulated as "common stock." For balance sheets reporting no par stock and not reporting capital stock value, the net worth is tabulated under "surplus and undivided profits."

The following table presents, by major industrial groups, the gross capital assets, reserves for depreciation and depletion (except on land), and net capital assets, secured by taking the difference between these two. Gross capital assets include (1) depreciable and depletable assets (buildings, machinery and equipment, furniture and fixtures, delivery equipment and natural resources) and (2) land. Attention is directed to the fact that the amounts of money in this table are in millions of dollars.

#### ASSETS AND LIABILITIES, COMPILED RECEIPTS AND COMPILED DEDUCTIONS BY TOTAL ASSETS CLASSES

For corporations submitting balance sheets, classified by total assets classes, the following table shows for all returns and for returns with net income and with no net income, the number of returns, total assets as of December 31, 1935, or the close of the fiscal year nearest thereto, total compiled receipts, compiled net profit or net loss, and net income or deficit. In basic table 5 there is shown, in addition, the principal assets and liabilities and the principal items of compiled receipts and compiled deductions. In basic table 6 selected items of the same character are presented for corporations submitting balance sheets, further classified by major industrial groups.

These data are compiled from 415,205 returns filed by corporations that submitted balance sheets. The difference between this number and 477,205 active corporations represents returns of corporations that did not submit balance sheets, or for which balance sheet data were fragmentary. In connection with the classification of corporation data by size of total assets, attention is directed to the fact that the balance sheet form "Schedule K" of the corporation income tax return (facsimile on pp. 110–115) provides that reserves for depreciation and depletion of capital assets be deducted from the gross amount of capital assets and also that reserves for bad debts be deducted from the gross amount of accounts receivable. For a descriptive statement of assets and liabilities, see pages 11–14, and of compiled receipts and compiled deductions, see pages 9–10.

#### CONSOLIDATED RETURNS OF BAILROADS

The privilege of filing consolidated returns, limited by the Revenue Act of 1934 (for taxable years ended December 31, 1934, and thereafter) to affiliated groups of railroad corporations, was exercised for 1935 by 63 such groups. On consolidated returns the income tax

rate is 15% percent.

According to section 141(d) of the Revenue Act of 1934, an affiliated group, which has the privilege of filing a consolidated returns, means one or more chains of corporations connected through stock ownership with a common parent corporation if—(1) at least 95 percent of the stock of each of the corporations (except the common parent corporation) is owned directly by one or more of the other corporations; and (2) the common parent corporation owns directly at least 95 percent of the stock of at least one of the other corporations; and (3) each of the corporations is either (A) a corporation whose principal business is that of a common carrier by railroad or (B) a corporation the assets of which consist principally of stock in such corporations and which does not itself operate a business other than that of a common carrier by railroad. The term "common carrier by railroad" includes steam and electric railroads but excludes street, suburban, and interurban railways, and express, refrigerator, and sleeping car companies. Thus, the consolidated returns do not include hotels, coal mines, and other extraneous corporations which are owned by railroads, since under the law, separate returns must be filed for each of these corporations.

In the first following table there appears, for the 63 consolidated returns, a summary of compiled receipts and compiled deductions, compiled net profit or net loss, net income or deficit, income tax, excess-profits tax, total tax, compiled net profit less total tax, and dividends paid, classified by returns with net income and with no net income. Assets and liabilities are shown in the second following table for the 62 consolidated returns submitting balance sheets.

The consolidated returns of railroads, which are all calendar year returns, are included in the text tables (except those for fiscal year returns and part year returns) and in all the basic tables in this report.

#### FISCAL YEAR RETURNS

Fiscal year returns are filed by corporations whose fiscal year is other than the calendar year. These returns are included in all basic tables in this report and in all text tables except those restricted to part-year returns and to consolidated returns in which categories no fiscal year return was filed. The tabulations include all fiscal year returns with year ended within the period July, 1935, through June, 1936, that were received by the Statistical Section prior to the final tabulation of the Statistics of Income data.

The number of returns, net income or deficit, income tax and excessprofits tax are tabulated for fiscal year returns with net income and with no net income. In the first following table these data are classified by the month in which the fiscal year ended, and in the second

following table by the size of the net income or deficit.

#### PART-YEAR RETURNS

The returns filed by corporations showing income for less than 12 months represent reorganizations, newly organized businesses, liquidating corporations, and changes from calendar year to fiscal year basis or vice versa. These returns are included in all text and basic tables in this report. The part-year returns tabulated herein represent those in which the greater part of the income period was in 1935.

#### HISTORICAL SUMMARIES

A résumé of the corporation returns showing number of returns, gross income, net income, deficit, tax, and the items of compiled receipts, compiled deductions, assets and liabilities is shown in the following tables. Attention is called to the fact that the amounts of money in the tables on pages 23–26 are in millions of dollars.

Corporation returns distributed by States and Territories, for the years 1926 through 1935, showing number of returns, gross income, net income, deficit, and tax, for returns with net income and with no net income are presented in basic table 8, pages 89-99. Similar data are shown by major industrial groups for the years 1926 through 1935

in basic table 7, pages 84-88.

The data for 1934 and 1935 are not strictly comparable with those for prior years as a result of the extensive discontinuance of the privilege of filing consolidated returns under the Revenue Act of 1934. (See section of this report entitled "Comparability with previous reports," p. 4, and Statistics of Income for 1934, Part 2, Corporation Income and Excess-profits Tax Returns and Personal Holding Company Returns, pp. 19-29.)

#### PERSONAL HOLDING COMPANY RETURNS

A personal holding company is defined under the provisions of section 351 of the Revenue Act of 1934 as any corporation (other than the specifically exempt corporations indicated below), if—(A) 80 percent or more of its gross income for the taxable year was derived from royalties, dividends, interest, annuities, and (except in the case of regular dealers in stock or securities) gains from the sale of stock or securities, and, (B) at any time during the last half of the taxable year more than 50 percent in value of its outstanding stock was owned, directly or indirectly, by or for not more than five individuals. Corporations specifically exempt from this tax are as follows: (1) Corporations exempt from income taxation (as listed in section 101 of the Revenue Act of 1934); (2) banks and trust companies incorporated under the laws of the United States or of any State or Territory, a substantial part of whose business is the receipt of deposits; (3) life insurance companies; and (4) surety companies.

The term "adjusted net income" means the net income computed without deducting dividends received (which are allowed as a deduction for income tax purposes), but minus the sum of: (a) Federal income, war-profits, and excess-profits taxes and foreign taxes (not deducted in computing net income on Form 1120), paid or accrued during the taxable year, but not including surtax on personal holding companies; (b) contributions or gifts to charitable, educational, and other similar organizations, which are not allowed as a deduction for income tax purposes; and (c) losses from sales or exchanges of capital assets which are disallowed as a deduction by section 117(d) of the

Revenue Act of 1934.

The term "undistributed adjusted net income" means the "adjusted net income" minus the sum of: (a) 20 percent of the excess of the adjusted net income over the amount of dividends received from personal holding companies; (b) amounts used or set aside to retire indebtedness incurred prior to January 1, 1934, if such amounts are reasonable with reference to the size and terms of such indebtedness; and (c) dividends paid during the taxable year.

The act imposes upon personal holding companies an additional graduated surtax of 30 percent of the undistributed adjusted net income not over \$100,000, plus 40 percent of the amount over \$100,000. Personal holding companies are subject to this surtax on Form 1120H (see facsimile on pp. 120–123) in addition to the corporation income

tax on Form 1120.

The personal holding company returns filed by corporations on Form 1120H, for the calendar year 1935 and for fiscal years ended in the period July, 1935, through June, 1936, numbered 5,075. There were 430 returns which showed undistributed adjusted net income and a surtax. No surtax liability was shown for 4,645 personal holding companies, which were divided into (a) 2,761 companies with no undistributed adjusted net income, of which 544 companies reported that each shareholder included his pro rata share of the adjusted net income of the corporation on his individual income tax return and 2,217 companies reported dividends distributed to shareholders and other credits in excess of adjusted net income and (b) 1,884 companies with no adjusted net income.

The accompanying tables are based on the returns as filed and prior to any revision or adjustment that may subsequently be made as a result of audit by the Bureau of Internal Revenue.

For returns Form 1120H of personal holding companies (a) with adjusted net income (divided into returns with surtax liability and the two types with no surtax liability) and (b) with no adjusted net income, the following table presents: number of returns, receipts, deductions not allowed on Form 1120, adjusted net income, adjusted net loss, credits, and surtax. In each case the returns were separated into those with net income and with no net income on Form 1120. In the tables throughout this report compiled from corporation income and excess-profits tax returns for 1935, the returns filed by these companies on Form 1120 were merged in the various industrial classifications according to the predominant business activity of the corporation as reported on that form.

The 430 returns of personal holding companies which report surtax liability show adjusted net income of \$22.356.267 and dividends paid of \$9,087,618, or 40.6 percent of their adjusted net income. distributed adjusted net income subject to surtax is \$8,785,604 and the surtax liability is \$2,968,620. Of the 430 returns, 257 show net income on Form 1120. The surtax liability on Form 1120H for these 257 returns is \$1,694,568. The surtax liability for the remaining 173 returns with undistributed adjusted net income but with no net income

on Form 1120 is \$1,274,052.

It is not possible to determine the amount of the income tax liability of the individual shareholders on Form 1040 with respect either to the pro rata shares of the adjusted net income shown on Form 1120H. which were reported on Form 1040, or to the dividends distributed by the personal holding companies to the shareholders.

Personal holding companies, 1935: number of returns, receipts, deductions, adjusted net income or adjusted net loss, credits and surtax, for returns with adjusted net income and with no adjusted net income on Form 1120H and for those with net income and with no net income on Form 1120

<sup>1</sup> Gross income and deductions correspond to total income and total deductions (items 14 and 26, respectively, on face of return) plus, in each instance, cost of goods sold and cost of operations (items 2 and 5 on face of return). Interest received on Liberty bonds, etc. (item 11 on face of return), has been deducted from gross income as this item was not included in gross income for prior years.

Includes excess-profits tax of \$19,554 on returns with no net income for income tax purposes. The credit for interest received on certain obligations of the United States and its instrumentalities, which is allowed against net income in the computation of the income tax, is not allowed against net income in the computation of the excess-profits tax. (See article 1(d) of Treasury Decisions 4469, "Regulations relating to the excess-profits tax imposed by section 702 of the Revenue Act of 1934.")

<sup>13</sup> Excess-profits tax of \$19,584 appears on returns submitting balance sheets with no net income for incometax purposes. The credit for interest received on certain obligations of the United States and its instrumentalities, which is allowed against net income in the computation of the Income tax, is not allowed against net lncome in the computation of the excess-profits tax. (See article 1 (d) of Treasury Decision 4469, "Regulations relating to the excess-profits tax imposed by section 702 of the Revenue Act of 1934.")

Il Excludes taxes reported in "cost of goods sold" and "cost of operations."

13 For limitation on amount of net capital loss that may be reported, see section of this report entitled "Revenue Acts of 1913-1934 and certain tax provisions of the National Industrial Recovery Act (1933); also the special excise tax under Act of August 5, 1909," p. 104, footnote 5 (c).

13 Excess-profits tax of \$19,584 appears on returns submitting balance sheets, with no net income for income tax purposes. The credit for interest received on certain obligations of the United States and its instrumentalities, which is allowed against net income in the computation of the income tax, is not allowed against net income in the computation of the excess-profits tax. (See article 1(d) of Treasury Decision 4469, "Regulations relating to the excess-profits tax imposed by section 702 of the Revenue Act of 1934.")

14 Compiled net loss or deficit.

15 Compiled net loss plus total tax.

16 Less than \$500.

<sup>18</sup> Less than \$500.

19 Compiled net profit.

18 Compiled net profit less excess-profits tax.

<sup>1</sup> Changes in the revenue acts affecting the comparability of statistical data from income tax returns of corporations are summarized on pp. 101-105. <sup>2</sup> Includes returns showing no income data—inactive corporations.

showing no net ncome.

<sup>&</sup>lt;sup>2</sup> Includes returns showing no fncome data—inactive corporations.
<sup>3</sup> Gross income corresponds to total income as reported on face of return, plus "cost of goods sold" and "cost of operations." For 1934 and 1935 interest on Liberty bonds, etc., has been deducted from gross income, as this item was not included in gross income for prior years.
<sup>4</sup> The excess-profits tax for 1933 became effective June 30, 1933, under the tax provisions of the National Industrial Recovery Act. Under the provisions of the Revenue Act of 1934, a small amount of excess-profits tax for 1934 and 1935 appears on returns with no net income for income-tax purposes. The credit for interest received on certain obligations of the United States and its instrumentalities, which is allowed against net income in the computation of the encome tax, is not allowed against net income in the computation of the excess-profits tax. (See article 1 (d), Treasury Decision 4469, "Regulations relating to excess profits tax imposed by section 702 of the Revenue Act of 1934.")
<sup>5</sup> Prior to 1927, returns showing no income data—inactive corporations—were included with returns showing no net neone.

For revised figures for 1928, see Statistics of Income for 1930, p. 238; for revised figures for 1930, see Statistics of Income for 1931, pp. 32 and 33; for revised figures for 1932, see Statistics of Income for 1933, p. 37.

5 Net income means "statutory" net income, i. e., the excess of gross income over deductions as defined in the various revenue acts. Foreign corporations report only income from sources within the United States; for 1921 and subsequent years domestic corporations deriving a large portion of their gross income from sources within a possession of the United States report only income from sources within the United States, or income from sources within or without the United States, received within the United States. (See sec. 25 of the Revenue Acts of 1921, 1924, and 1926 and sec. 251 of the Revenue Act of 1928 and subsequent acts.) (See sec. 262 Net income has been adjusted from time to time as follows:

(a) Amortization of buildings, machinery, equipment, or other facilities constructed or acquired on or after April 6, 1917, for the production of articles contributing to the prosecution of the war, is included to a reasonable amount in business deductions, 1918 through 1921.

(b) Dividends on stock of all corporations liable to the tax imposed by the Revenue Acts of 1909, 1917, and (b) Dividends on stock of all corporations hable to the tax imposed by the Revenue Acts of 1808, 1817, and 1918 are deductible, under the Revenue Acts of 1913 and 1916, dividends were not deductible. Under the Revenue Acts of 1921 through 1932, dividends on stock of domestic corporations (other than (1) those deriving a large portion of their gross income from sources within a possession of the United States, 1921 and subsequent years, (2) China Trade Act Corporations, 1922 and subsequent years, and (3) corporations exempt from tax, 1932 and subsequent years) as well as dividends on stock of foreign corporations receiving a certain amount of income from sources within the United States, are deductible. (Such deductible dividends are not included in the amount of gross income shown in "Statistics of Income" for 1918 due to the fact that on

not included in the amount of gross income shown in "Statistics of Income" for 1918 due to the fact that on the return these dividends were designated as nontaxable income.) Under the Revenue Act of 1934, dividends on stock of domestic corporations (other than (1), (2), and (3) above) are deductible, but dividends on stock of foreign corporations are not deductible. For deduction of dividends paid on preferred stock, by certain incorporated banks and insurance companies, to the United States, or to any instrumentality thereof which is exempt from Federal income taxation, see section 121 of the Revenue Act of 1934, which section was added by Public, No. 374, 74th Congress.

(c) Losses sustained during a taxable year and not compensated for by insurance or otherwise, are entirely deductible, except that for 1932 and 1933 losses from sales or exchanges of stocks or bonds (other than capital assets and other than bonds issued by a government or political subdivision thereof) are allowed only to the extent of the gains from such sales or exchanges. The Revenue Act of 1932 provides that any excess loss thus disallowed, computed without regard to any losses sustained during the preceding taxable year, is, to an amount not in excess of the taxable year from sales or exchanges of stocks or bonds often than capital assets. The limitation on the deduction of losses from sales or exchanges of stocks or bonds does not apply to dealers in limitation on the deduction of losses from sales or exchanges of stocks or bonds other than capital assets. The limitation on the deduction of losses from sales or exchanges of stocks or bonds does not apply to dealers in securities, banks, or trust companies. (See sec. 23 (r), Revenue Act of 1932.) However, section 218 (b) of the National Industrial Recovery Act repeals, effective as of Jan. 1, 1933, section 23 (r) (2) of the Revenue Act of 1932, thereby limiting the application of losses from the sale or exchange of stocks or bonds (other than capital assets) to gains from similar transactions during the same taxable year and prohibiting the carrying forward and application of such losses to gains from similar transactions in the succeeding taxable year. By the Revenue Act of 1934, the definition of capital assets is broadened to include all property held by the tax-payer, whether or not connected with trade or business, regardless of period held, except stock in trade, property which would be included in inventory, or property held for sale in ordinary course of business or trade. For 1934 and subsequent years, corporations are permitted to deduct capital losses to the extent of \$2,000 after subtracting the amount of capital gains (such deduction not to exceed the actual net capital loss), expent that this limitation does not anythe blosses sustained the actorial basks and the restrict convenience of the

\$2,000 after subtracting the amount of capital gains (such deduction not to exceed the actual net capital loss), except that this limitation does not apply to losses sustained by certain banks and trust companies on the sale of certain bonds, etc. (See sec. 117 (d), Revenue Act of 1934.)

(d) Net loss for prior year resulting from the operation of any trade or business regularly carried on by the taxpayer: In the case of a net loss for any taxable year beginning after Oct. 31, 1918, and ending prior to Jan. 1, 1920, the Revenue Act of 1918 provides for the deduction of such loss from the net income of the preceding year, a redetermination of taxes for the preceding year being made. When the net loss exceeds the net income for the preceding year the amount of such excess is to be deducted from the net income of the succeeding taxable year. The Revenue Acts of 1921 through 1928 provide that net loss in any year beginning after Dec. 31, 1920, may be deducted from the net income of the succeeding taxable year, and if such net loss exceeds the net income for the succeeding year, the amount of such excess is to be allowed in the next succeeding year. The Revenue Act of 1932 provides that a net loss for the year 1930 or 1931 shall be allowed as a deduction in computing net income for one succeeding taxable year only. However, section 218 (a) of the National Industrial Recovery Act repeals, effective as of Jan. 1, 1933, sections 23 (i) and 117 of the Revenue Act of 1932, thereby removing the privilege of deducting from the net income for the current taxable year a net loss for the preceding taxable year. There is no provision in the Revenue Act of 1934 for deduction of net loss for prior year.

The \$3,000 credit not allowable to foreign corporations.

Invested capital within the meaning of the statute is the capital actually paid in to the corporation by the stockholders, plus the earned surplus and/or undivided profits (exclusive of profits for the current year) and exclusive of inadmissible assets as defined in the revenue acts. (See sec. 207, Revenue Act of 1917, and secs. 325 and 328, Revenue Act of 1918.) For 1917, foreign corporations reported that proportion of invested capital which net income from sources within the United States was of the trire net income. For the years 1918 through 1921, it was not necessary for foreign corporations to report invested capital, and for the year 1921 it was not necessary for corporations deriving a large portion of their gross income from sources within a possession of the United States to report invested capital. (See note 3.)

§ Foreign corporations were not allowed to deduct income taxes paid to foreign countries either as a tax credit or in general deductions for the years 1918, 1919, and 1920.

One \$3,000 credit not allowable to domestic corporations deriving a large portion of their gross income from sources within a possession of the United States.
Deginning with 1921, the credit cannot exceed the proportion of the total tax against which the credit is taken, that the taxpayer's net income from sources without the United States bears to the entire net income. This credit does not apply to foreign corporations or to domestic corporations deriving a large portion of their gross income from sources within a possession of the United States, but to such corporations these taxes are allowable as a deduction from gross income if imposed upon income from sources within the United States. For the years 1921 through 1931 the amount of income and profits taxes paid to foreign countries or United States possessions in excess of that deducted as a tax credit is permitted to be included in deductions against gross income. (See note 16)

States possessions in excess of that deducted as a tax credit is permitted to be included in deductions against gross income. (See note 16.)

"I For 1922 and subsequent years, corporations are allowed, as a credit against net income for income tax purposes, the amount received as interest upon obligations of the United States which is required to be included in gross income (e. g., see see. 236 (a). Revenue Act of 1924). For 1922 and subsequent years China Trade Act corporations are entitled to a specific credit. (See see. 264 (a), China Trade Act, 1922.)

12 Not allowable to China Trade Act corporations for 1922 and subsequent years.

income tax for 1929.

15 The rate of tax on consolidated returns for 1932 and 1933 is 14½ percent, except for returns with fiscal year ended in 1934 on which the tax attributable to 1934 is at the rate of 1434 percent. (See sec. 218 (e), National Industrial Recovery Act.) The rate of tax on consolidated returns with year beginning on, or after January 1945 (e.g., National Industrial Recovery Act.) Industrial Recovery Act.) The rate of tax on consolidated returns with year beginning on, or after January 1, 1934 is 15¾ percent. Under the Revenue Act of 1934, only railroad corporations are permitted to file consolidated returns.

16 For 1932 and subsequent years, the taxpayer may elect to credit the income and profits taxes paid to foreign countries or United States possessions (with certain limitations) against the income tax liability to the United States, or to include the entire amount of such taxes in deductions against gross income. (See sees. 131 and 23 (c), (2), Revenue Acts of 1932, and 1934.)

17 See note 5 (e) and (d) and note 15.

18 For 1934 and subsequent years, interest on Liberty Bonds, etc., which is required to be included in gross

income, is included in net income for excess profits tax computation. (See note 11.)

19 If corporation was not in existence during the whole of at least one calendar year during the pre-war

period, the credit (with certain exceptions) shall be the sum of \$3,000 and an amount equal to the same percentage of invested capital for the taxable year as the average percentage of net income to invested capital for the pre-war period of representative corporations, but such amount shall in no case be less than 10 percent of the invested capital of the taxpayer for the taxable year. (See sec. 311, Revenue Act of 1918.)

Note.—For the year 1917 there was also a tax of 10 percent upon that portion of the total net income remaining undistributed six months after the close of the taxable year, in excess of the income actually employed in the business or invested in obligations of the United States issued after Sept. 1, 1917.

For the years 1918 through 1920, a corporation that permitted an unreasonable accumulation of profits was not subject to the ordinary corporation income tax, but the individual stockholders were taxed upon their proportionate shares of its net income.

For the years 1921 through 1923, an additional tax of 25 percent was imposed upon the taxable net income

of a corporation where it was shown that there had been an evasion of surfax as the result of an unreasonable accumulation of profits. This additional tax was increased to 50 percent for the years 1924 through 1933, with the provision for 1926 and subsequent years that the additional tax shall not apply if all the shareholders of the corporation include in their gross income their entire distributive shares, whether distributed or not, of the net income of the corporation for such year.

For 1934 and 1935 every corporation improperly accumulating surplus (other than a personal holding company) is subject to a tax on the adjusted net income at the rate of (1) 25 percent of the amount of the adjusted net income not in excess of \$100,000, plus (2) 35 percent of the amount of the adjusted net income in excess of

\$100,000.

# INSTRUCTIONS

The Instructions Numbered 1 to 13 Correspond with the Item Numbers on Page 1 of the Return

#### CROSS INCOME AND DEDUCTIONS

- 1 Interest.-Enter as item 1 interest received from all sources during the taxable year. Interest on bonds is considered income when due and payable.
- 2. Dividends.-Enter as item 2 (a) the amount received as dividends (1) from a domestic corporation which is subject to taxation under Title I of the Revenue Act of 1934 other than a corporation entitled to the benefits of section 251 of the Revenue Act of 1934 and other than a corporation organized under the China Trade Act, 1922. Enter as item 2 (b) dividends from a domestic corporation which is not subject to taxation under Title I of the Revenue Act uf Enter as item 2 (c) dividends from a foreign corporation and dividends from a corporation entitled to the benefits of section 251 of the Revenue Act of 1934 and a corporation organized under the China Trade Act, 1922. Submit schedule, itemizing all dividends received during the year stating amounts and names and addresses of the corporations declaring the dividends.
  - 3 Ronts -- Enter as item 3 rents received from tenants.
- 4. Total income. Enter as item 4 the total of items 1 to 3. inclusive
- 5. Interest exempt from toxation.—Enter as item 5 the amount of interest which is wholly exempt from taxation under the provisions of section 22 (b) (4) of the Revenue Act of 1934
- See Instruction 16 with respect to partially tax-exempt interest which is allowed as a credit against net income
- 6. Percentage of the mean of the reserve funds,-Enter as item 6 the amount reported as item 6 in Schedule A. There may be deducted from gross income an amount equal to 4 percent of the mean of the reserve funds required by law and held at the beginning and end of the taxable year, except that in the case of any such reserve fund which is computed at a lower interest assumption rate, the rate of 3% percent shall be substituted for 4 percent. Life insurance companies issuing policies covering life, health, and accident insurance combined in one policy issued on the weekly premium payment plan, continuing for life and not subject to cancellation, shall allowed, in addition to the above, a deduction of 3% percent of the mean of such reserve funds (not required by law) held at the beginning and end of the taxable year, as the Commissioner finds to be necessary for the protection of the holders of such policies only. For definition of "allowable reserves" see Article 203 (a) (2)-1 Regulations 86
- 7. Dividends.-Enter as item 7 the total amount of dividends deductible under section 203 (a) (3) of the Revenue Act of 1934
- 8. Two percent of the reserve held for deferred dividends. -- Enter as item 8 an amount equal to 2 percent of the reserve held at the end of the taxable year for deferred dividends the payment of which is deferred for a period of not less than 5 years from the date of the policy contract. Do not include in such reserve dividends payable during the following taxable year.
- 9. lovestment expenses.-Enter as item 9 expenses paid which are properly chargeable to investment expenses, the total amount of which, if there be any allocation of general expenses to investment expenses, should not exceed one-fourth of 1 percent of the mean of the invested assets reported in item 11, Schedule B. Submit a schedule showing the nature and amount of the items included herein, the minor items being grouped in one amount. See section 203 (a) (5) of the Revenue Act of 1934. For definition of "general expenses see Article 203 (a) (5)-1, Regulations 86.
- 10. Taxes.-Enter as item 10 taxes paid exclusively upon real estate owned by the company, and that proportion of the taxes assessed against individual shareholders and paid by the compa without reimbursement, ss provided in section 203 (a) (6) of the Revenue Act of 1934. Do not include taxes assessed against local benefits of a kind tending to increase the value of the property assessed, as for paving, sewers, etc. For limitation on deduction see Article 203 (8) (6)-1, Regulations 86.
- 11. Other real estate expenses. Enter as item 11 all ordinary and occessary building expenses, such as fire insurance, heat, light, labor, etc., and the cost of incidental repairs which neither materially add to the value of the property nor appreciably prolong its life, but keep it in an ordinarily efficient operating condition. Do not include any amount paid out for new buildings or for permanent improvements or betterments made to increase the value of any property. For limitation on deduction see Article 203 (a) (6)-1.
- 12. Depreciation .- The amount deductible on account of depre ciation in item 12 is an amount reasonably measuring the portion of the investment in depreciable property by reason of exhaustion, wear and tear, or obsolescence, which is properly chargeable against

the operations of the year. In any event the deduction is limited the operations of the year. In any event the deduction is limited to the depreciation on the property that is used, and to the extent used, for the purpose of producing the income specified in section 202 (a) of the Revenue Act of 1934. If the property was acquired by purchase on or after March 1, 1913, the amount of depreciation should be determined upon the basis of the original cost (not replacement cost) of the property, and the probable number of years remaining of its expected useful life. In case the property was purchased prior to March 1, 1913, the amount of depreciation will be determined in the same manner, except that it will be computed on its original coat, less depreciation sustained prior to March 1, 1913. or its fair market value as of that date, whichever is greater. property was acquired in any other manner than by purchase, see accion 114 of the Revenue Act of 1934. The capital aum to be recovered should be charged off ratably over the useful life of the property. Whatever plan or method of apportionment is adopted must be reasonable, must have due regard to operating conditions during the taxable year, and should be described in the return.

If a deduction is claimed on account of depreciation, Schedule C In case obsolescence is included, state separately should be filled in amount claimed and basis upon which it is computed. Laud values or cost must not be included in the schedule, and where land and buildings were purchased for a lump sum the cost of the building subject to depreciation must be established.

The adjusted property accounts and the accumulated depreciation shown in the schedule should be reconciled with those accounts as reflected on the hooks of the taxpaver.

Stocks, bonds, and like securities are not subject to exhaustion, wear and tear, within the meaning of the law.

See sections 23 (I), 114, and 203 (a) (7) of the Revenue Act of 1934.

- 13. Interest on indebtedness.-Enter as item 13 the amount of interest paid during the taxable year on the company's indebtedness, except on indebtedness incurred or continued to purchase or carry obligations (other than obligations of the United States issued a September 24, 1917, and originally subscribed for by the taxpayer) the interest upon which is wholly exempt from taxation. Interest paid on dividends held on deposit and surrendered during the tax-able year should be included in this item. Do not include any interest paid on deferred dividends on which a deduction was allowed under item 8.
- 14. Rental value of real estate. The deduction included in items 10 to 12 on account of real estate owned and occupied in whole or in part by the company shall be limited to an amount which bears the same ratio to such deduction (computed without regard to aubsection (b) of section 203 of the Revenue Act of 1934) as the rental value of the space not so occupied bears to the rental value of the entire property. (Submit detailed schedule.)
- 15. Items not deductible.-No deduction is allowable for the amount of any item or part thereof allocable to a class of exempt income, other than interest. Items directly attributable to such exempt income shall be allocated thereto, and items directly attributable to any class of taxable income shall be allocated to such taxable income. A taxpayer receiving say exempt income, other than interest, or holding any property or cogaging in any activity the income from which is exempt shall submit with its return as a part thereof an itemized statement, in detail, showing (1) the amount of each class of exempt income, and (2) the amount of items allocated to each such class (the amount allocated by apportionment being shown separately).

Section 351 of Title IA of the Revenue Act of 1934 imposes an additional Section 351 of Title IA of the Revenue Act of 1933 imposes an additional graduated income fax or surfax upon corporations classified as personal holding companies. Corporations so classified are exempt from the surfax on corporations improperly accumulating surplus imposed by section 190 of Title I of the Revenue Act of 1934, but are not exempt from the other taxes imposed by settion 190, the surfax imposed by section 191, and the surfax imposed by section 351 applies to all personal holding companies defined as such in Instrucrection or regardless of whether or not they were formed or availed of to accumulate gains and profits for the purpose of avoiding surfax upon shereholders.

# 2. CLASSIFICATION OF A PERSONAL HOLDING COMPANY

2. CLASSIFICATION OF A PERSONAL HOLDING COMPANY A personal holding company is defined as any corporation (other than a corporation specifically exempt), first, 80 percent or more of whose gross income for the taxable year was derived from royalizing, dividends, interest, annuties, and gains from the sale of stock or securities; and, second, more than 80 percent in value of whose outstanding stock was owned, directly or indirectly, at any time during this last half of the taxable year by or for not more than five indi-viduals. The only corporations specifically exempt from this tax are as follows: (1) Corporations exempt from taxation under section 101 of Title 1; (2) banks and trust companies (incorporated under the law of the United States, or de-posits; (3) life insurance companier, and (4) surety companies.

deposits; (3) life insurance companier; and (4) surety companies.

It is the nature of the gross income and the convership of the outstanding stock which determine the clessification as a personal holding company, and the acceral conditions with respect to both must be satisfied to bring a corporation within the classification. Cross income must be determined for the entire tranship year and the conversible of the stock sustaining must be determined according to it is such circumstance can sure the least of the stock sustaining must be determined according to it is easily as the conversion of the stock sustaining must be determined according to it is easily considered to the conversion of the stock sustaining must be determined according to it is easily considered to the conversion of the stock sustaining the late of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stock of the stoc

The gross income for purposes of section 351 means the gross income as computed under sections 22, 204, and 231 and the regulations thereunder, for purposes of the taxes Imposed by Title I. Accordingly, Items excluded from the gross income under Title I are not to be included to determining gross income under section 351. Gross income is not synonymous with gross receipts. For example, section 312, the properties of the section of the properties of the section of the section 113 (b). It does not include gains which are not recognized under section 113 (b). It does not include gains which are not recognized under section 113 (b). It has case of a corporation reporting or the installment basis, it includes only that portion of the gain returnable as income under section 14. In the case of a corporation reporting or the installment basis, it includes only that portion of the gain returnable as income under section 44. In the case of a corporation reporting or the installment basis, it includes only that portion of the gain returnable as income under section 44. In the case of a manufacturing, merchandising, or uning business, "gross income," means the total sales, less the cost of goods sold, plus any income from investments and from inclined not routised operations or sources. In determining gross income, subtractions should not be made for depreciation, depletion, selling expenses, or losses, or for items not ordinarily used in computing the cost of goods sold. Sales of capital assets as defined in section 117 must be treated as separate transactions and only those sales which individually resulted in profits shall be considered in determining the gains derived from such source. Gains from all transactions intolowing stock in trade, etc., are determined for the stankle years as a whole instead of separately.

# 3. NATURE OF GROSS INCOME

From the standpoint of the nature of the gross income, a corporation comes within the definition of a personal holding company for any taxable year when 80 percent or more of its gross income for such taxable year was derived from the following sources

- (a) Royalties.—The term "royalties" includes amounts received for the use (a) Royalties.—The term "royalties" includes amounts received for the use of rof the privilege of using petentia, copyright, secrets processes and formulas, good will, trade marts, trade brands, franchises, and other like property. It does not include rents, nor overriding royalties received by an operating com-pany. As used in this paragraph the term "overriding royalties" means amounts rendered from a sublesses by the operating company which originally lessed and developed the natural resource property in respect of which each overriding royalties are paid
- (b) Dividends —The term "dividends" means dividends as defined in section 115 (a). It does not include stock dividends, liquidating dividends, or other capital distributions referred to in section 115 (c), (d), and (f).
- (c) Interest.—The term "interest" means any amounts received for the use of borrowed money which are includible in gross income under Title I.
- (d) Annuities.—The term "annuities" refers only to annuities to the extent includuble in the computation of gross income under Title I.
- (c) Goins from the sale of stock or securities.—The term "gains from the sale of stock or securities applies to all gains (including gains from liquidating dividends and other distributions from acquidating dividends and other distributions from acquidation from the sale or exchange of stock or securities includible in gross income under Title I. The term "stock or securities" including shares or certificates of stock or interest in any corporaor securities" includes shares or certificates of stock or interest in any corpora-tion (including any joint-stock company, insurance company, sessionts), or cother organization classified as a corporation by the Act), certificates of interest or participation in any profit sharing agreement or in any oil, gas, or other mineral royalty or lease, collateral trust certificates, voting trust certificates, respectively. The term "regular dealers in stock or securities" means exponsitions with an established place of business regularly engaged in the purchase of stock or securities and their results to customers. A corporation which is a regular dealer in stock or securities but which buys or sells or holds stock or securities for investment or speculation is out a dealer with respect to such stock or securities.

# 4. STOCK OWNERSHIP

From the standpoint of the ownership of the outstanding stock, a corporation comes within the deficition of a personal holding company for any taxable year if at any time during the last half of the taxable year more than 50 percent in value of the stock outstanding was owned, directly or indirectly, by or for out more than 6 we individuals. The ownership of the stock shall be determined in accordance with the following rules:

- in accordance with the rolowing rules.

  (a) All forms and classes of stock, however denominated, which represent the interests of the shareholders, members, or beneficiaries in the corporation shall be taken into consideration. For the purpose of determining such ownership, the Act provides that stock owned, directly or indirectly, by a corporation, partnership, estate or trust shall be considered as being owned proportionately by its shareholders, partners, or beneficiaries.
- by its energoneers, paramers, or henceurene.

  (b) The stock outstanding ofly during the last half of the taxable year shall be taken into consideration. However, and in the event of any change in the stock outstanding during such period, whether in the number of abarcs or classes of stock or whether in the ownership thereof, the conditions existing immediately prior and subsequent to case thange must be taken into consumeration, since a corporation comes within the classification if the statutory conditions, which is not considered to stock ownership are present at one yield register to stock ownership are present at one yield register to stock ownership are present at one yield register.
- (c) The stock owned by an individual shall include all stock in the seme corporation owned, directly or indirectly, by the members of his family. For this purpose the family of an individual shall include only his brother and sasters (whether by the whole or half blood), spouse, ancestors, and lineal de-

scendants. The Act further provides that this rule shall be applied in such manner as to produce the smallest possible number of individuals owning, directly or indirectly, more than 50 percent in value of the outstanding stock.

For example, the M corporation at some time during the text half of the taxable year had 1,800 shares of outstanding stock, 450 of which were held by various individuals having on relationship to one another and the remaining 1,350 were held by 50 shareholders having the relationship and individual shareholdings have been supported by the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of

If a value of stock is used which is greatly at variance with that reflected by the corporate books, the evidence upon which such valuation is based chould be filed with the return. In any case where there are two or more cleases of stock outstanding, the total value of all the stock aboud be allowed among the different classes according to the relative value of each class therein.

#### 5. COMPUTATION OF UNDISTRIBUTED ADJUSTED NET INCOME

5. COMPUTATION OF UNDISTRIBUTED ADJUSTED NET INCOME In ascertaining the tax basis for personal bodding companies, the "adjusted net iccome," is first computed. This is accomplished by adding to the corporate excitosem, as defeued in Title, the anount of dividends received from domestic corporations which are deductible under section 23(n), and by enbtracting thereform (a). Pederal income, war-profits, and excess-profits taxes paid or accrued, but not including the surtax imposed by section 351, (b) contributions or gifts not otherwise allowed as a deduction to or for the use of donces described in section 23(o) for the purposes therein specified, and (c) losses from sales or exchanges of capital assets which are deallowed as a deduction by section 117(d). The foreign tax credit permitted by section 231 with respect to the taxes imposed by Title I is ortal allowed with respect to the surtax imposed by section 351. However, the deduction of foreign taxes under section 23(c) is permitted for the purposes of the surfax even if for the purposes of the corporate tax imposed by Title I a credit for such taxes is taken.

# 6. AMOUNTS USED OR SET ASIDE TO RETIRE INDEBTEDNESS INCURRED PRIOR TO JANUARY 1, 1934

If, pursuant to a bons fide plan for the retirement of its boods, debenture or similar obligations representing todebtedness incurred prior to Jaouary 1, 1934, for the purpose of raising capital (or assumed prior to that date in consection with the acquisition of capital assets by which such indebtedness is secured) the taxpayer-

(1) retires during the taxable year an amount of such indebtedness, or

(1) retures during use taxanic year an amount or such incentiones, or (2) establishes a sinking fund or reserve for the retirement of such indebtedness during the taxable year, and sets aside in such fund or reserve an amount for the returnment of such indebtedness—an amount for the returnment of such indebtedness—in determining the undistributed adjusted net income in allumballe in a reasonable amount. in respect of the amount so paid or set aside in such fund or reserve during the

The amount allowable as a deduction in any case must be reasonable, consider ing the nature, purposes, scope, conditions, amount, maturity, and other terms of the indebtedness. No deduction is allowable unless it appears, either from the covenants of the obligations or from a recognized business and accounting practice respecting the retirement of such indebtedness, that provision for retiremeet must be made out of earnings for the taxable year before distribution of such earnings may be made. The reasonableness of the deduction shall be determined upon existing conditions known at the close of too taxable year. The fact that amounts have not been used or set and/or in proven will not exitile the taxpayer to deduct in ony taxable year a greater amount than would otherwise be allowable. Amounts paid or set and/or be considered to the start of the set of the start of the set of

or the realist, of our the defining of etter.

No deduction will be permitted with respect to any item for which a deduction is otherwise allowable under Title IA or Title I of the Reveoue Act of 1934 or under any applicable prior income tax act.

A resolution, specifying the particular indebtedoes to be retired, the plan of retirement, and the specific assets to be used for that purpose, passed by the board of directors or corresponding authority during the taxable period or prior thereto, will be considered sufficient to meet the etatutory requirement that the amounts must be "est aside." A certified copy of such resolvition must accomnany this return

The burden of proof will rest upon the taxpayer to sustain the deduct claimed. Therefore, the taxpayer must furnish the information required by Schedule E of this return and auch other information as the Commissioner may require in substantiation of the deduction claimed.
